Chamber Chatter

By Claudia Hughes, Chamber Manager

Many studies have been done on the effect laughter has on the human body. Time and again, it has been proven that laughing is the healthiest thing we can do for our bodies. Too often education focuses totally on developing the logical left brain to the exclusion of the creative, fun-loving right brain. Professionals say that play, laughter, camaraderie, and spontaneity lead to creativity and success. People do need to take their work seriously, but we also need to remember to take ourselves lightly, keep our sense of humor, and have some fun once in awhile. (That explains why "someone" felt the need to enter the shoe kicking contest at fair.)

Walt Disney knew this when he planned a playground where adults could be young at heart. Chamber members learned Tuesday while viewing a section of Tom Peters Search for Excellence video, that a good deal of training and work goes into this. The section dealt with training Disney employees in the business of making people happy. Custodians, waitresses, ticket takers, Disney characters are all taught to be hosts and hostesses. They are taught to communicate a message which makes all people feel special. Behind the scenes, we learned that employees and customers are important.

Heppner doesn't have Mickey Mouse (he's welcome to visit, however). We live here because we like our small town, but the same principles apply being polite, helpful, courteous, friendly, and sharing what we have to offer. So, let's bring our "wholeselves" to work where we, too, are in the business of making other people happy.

Join Chamber. Next meeting is Tuesday, September 1, 12 noon at the Elks.
