Guess what cities just got the most advanced phone system on earth.

U S WEST Communications has just installed the most advanced electronic switching system in the world, right here in your service area. Thanks to our new equipment, touchtone service and six custom calling services are now available to you. And, they'll work with the telephone sets you already have.

- 1. Touchtone Service:** Now you can switch to the extra convenience of touchtone service anytime you like.
- 2. Call Waiting:** If someone calls while you're already talking, a "beep" signals that you have another call. Put the first call on hold while you take the new call. Family and business associates can always get through, even when your line is "busy."
- 3. Three-Way Calling:** Set up three-way conference calls with two other people in two other places, for business discussions, family birthdays, a reunion

- 4. Call Forwarding:** When you leave home, you can forward your calls to another direct-dialed number where you can be reached or where someone can take a message.
- 5. Speed Calling:** Reach frequently called numbers by dialing a single digit. An important aid to the handicapped and elderly, and a convenience for busy people, Speed Calling also can save precious seconds when linked to emergency numbers such as your doctor, ambulance service, etc.
- 6. Call Hold:** You can put a call on hold for privacy while you speak with someone else in your home, or while you make another phone call.
- 7. Intracall:** Allows you to talk to people in other parts of your home: upstairs, downstairs, in the garage, out in the barn—anywhere there's an extension phone. Saves having to hunt someone

down or shouting messages. Intracall is great for small businesses, too. For more information about the new services, or to add any or all of them to your present home or business service, contact your business office toll free at 1-242-5316.
