

Oregonians Throughout the State Urge **NO** on Measures 5 & 6

Measures 5 & 6 would each:

Immediately shut down the Trojan electric plant—increasing the risk of power shortages.

Electricity supplies are already tight. Yet, Measures 5 and 6 would each shut down Trojan immediately—cutting off nearly 20% of our state's electricity supply, with no time to develop replacement power.

Cause nearly 1,000 workers at Trojan to immediately lose their jobs—and damage our economy.

An immediate shutdown would immediately force nearly 1,000 men and women at Trojan out of work. The power shortages and higher electric bills caused by Measures 5 and 6 would hurt employers throughout the state—threatening thousands of other Oregon jobs.

Cost consumers nearly \$500 million in higher electric bills.

Studies show that the immediate shutdown of Trojan proposed by Measures 5 and 6 would increase our electric bills—costing consumers nearly \$500 million dollars more than the existing plan to phase out Trojan in 4 years.

Put more pressure on our hydroelectric system—hurting Oregon farmers and salmon protection efforts.

In the midst of our drought, an immediate shutdown of Trojan would increase the pressure to use more hydro-power, leaving Oregon farmers with even less water for crop irrigation and hurting efforts to protect endangered salmon runs.

Partial list of over 25,000 members of the **NO** on 5 & 6 Committee*

Neil Goldschmidt
Former Governor
of Oregon

Emily Cedarleaf
Executive Director
Multifamily Housing
Council of Oregon

Irv Fletcher
