Your personal information is available on the Internet

Starting in May 2006, a new database website, www.zabasearch.com, became available to the general public free of charge and displays personal information (names, addresses, phone numbers, birth dates, etc.), informed Duane Jones, of Heppner, who recently found out about the website. Jones, a victim of identity theft, was concerned about this site and wanted to share with the community that this information, used by identity thieves, was very easy to get. He also informed that the site, for a price, would provide social security numbers.
