More than 20,000,000 Hershey's Kisses are wrapped each day, using 133 square miles of tin foil. All that foil is recyclable, but not many people realize it.

Recycling helps protect our resources, our environment, our quality of life.

Why Recycling is Important
As stewards of the environment, we are responsible for preserving and protecting our resources for ourselves and for future generations.

Every month, we throw out enough glass bottles and jars to fill up a giant skyscraper. All of these jars are recyclable!

A typical family consumes 182 gallons of pop, 29 gallons of juice, 104 gallons of milk, and 26 gallons of bottled water a year. That's a lot of containers -- make sure they're recycled!
