Cool, awesome and fantastic experiments at 7th annual Ione Science Fair

"Once again I was amazed and impressed with all of the wonderful projects and experiments that students created," said Orissa Burghard, organizer of the Ione Science Fair. The 7th annual science fair boasted a solar heater, a wind turbine, a study on blood spatter patterns, a study on garlic and bacteria and on the effect of ensiling on weed seeds. The elementary school entered 27 projects this year, not counting the all class presentations. There were 23 entries from the middle school and 26 individual entries from the high school.

Burghard said she wants to give a rousing thanks to the entire community of Ione, the parents and the Ione School District staff for the amazing support, work, enthusiasm and patience that everyone showed during the science fair. "It is my opinion that there were some pretty cool, awesome, fun, and fantastic science experiments presented," she said.
