# Genetic results confirm OR7's mate and pups

OR7 (above), originally from northeast Oregon, has set up housekeeping with a mate and pups in the southwest Cascades. -Photo courtesy of ODFW

ODFW (Oregon Dept. of Fish and Wildlife) received University of Idaho's report on scat samples collected in May and July of this year. The samples were taken from the area being used by wolf OR7, his female mate and pups in the southwest Cascades. As expected, the samples identified OR7's

mate and two of the pups as wolves. The results do not indicate specifically where OR7's mate was born, but show that she is related to other wolves in northeast Oregon (Snake River and Minam packs). The two pup scats also identified the pups as offspring of OR7 and his new mate.

Or send by deadline to MC Fair, PO Box 464, Heppner, OR 97836

## Bank of Eastern Oregon

NMLS #414459

We all depend on agriculture. Around here agriculture is the engine that makes our economy go. When something's good for agriculture, it's good for our community. We would like to take this opportunity to thank our area farmers, ranchers, & producers for all they do to make our area a better place to live.

# FLU SHOTS
