fast. He said they are big, about the size of his thumb.

"In short there is a variety of things that work, but a lot of variables. Crops, crops for human consumption, organic crops, rangeland, waterways, BLM, Navy, Nature Conservancy....," Doherty concluded.

He told the Gazette-Times the county is

considering whether to put money into spraying this year, or wait until next year to start its treatment efforts. He said the county Soil and Water Conservation District has also been asked to get involved, and they are, of course, working closely with Gilliam County on the Mormon Cricket problem.

Rep. Smith moves to increase state school funding

Representative Greg Smith (R-Heppner) made a motion to send the school budget bill (SB 5514) back to the Joint Committee on Ways and Means from the floor to increase the amount from \$9.3 billion to \$9.6 billion before it passed.

Representative Smith and his fellow House Republicans have supported school districts' calls for a fully funded school budget, which education leaders say amounts to \$9.6 billion to avoid layoffs and budget cuts. The current proposal is \$300,000,000 less than what schools need to operate at full capacity.

"After a year-long pandemic, if ever there was a time to fully fund our schools, it would be now" said Representative Smith. "SB 5514 truly is a good budget at \$9.3 billion, but we need to take a good budget and make it great by fully funding our K-12 schools at \$9.6 billion"
