

DEPARTMENT OF AGRICULTURE
Rural Development
City of Ione: Notice of Availability of an Environmental Assessment
 AGENCY: Rural Development, USDA
 ACTION: Notice of Availability of an Environmental Assessment
 SUMMARY: Notice is hereby given that the Rural Development (RD) as required by the National Environmental Policy Act, is issuing an environmental assessment (EA) in connection with possible impacts related to a project proposed by the City of Ione (City), of Morrow County, Oregon. The proposal is for construction of a septic tank effluent gravity system. The City has submitted an application to RD for funding of the proposal.
 FOR FURTHER INFORMATION CONTACT: LaDonn McElligott, USDA Rural Development Area Specialist, 541-624-3087, 1901 Adams Avenue, Suite 1 La Grande, OR 97850, ladonn.mcelligott@usda.gov
 SUPPLEMENTARY INFORMATION: The City of Ione proposes to construct a septic tank effluent gravity system, which will consist of new individual septic tanks, 30,000 linear feet of gravity sewer, a new lift station, 7,100 linear feet of force main along Johnson Grade Road, and a 20-acre common drainfield. Anderson Perry & Associates, Inc., an environmental consultant, prepared an environmental assessment for RD that describes the project, assesses the proposed project's environmental impacts, and summarizes as applicable any mitigation measures used to minimize environmental effects. The proposed project will utilize the Nationwide Programmatic Agreement Among the U.S. Department of Agriculture Rural Development Programs, National Conference of State Historic Preservation Officers, and The Advisory Council on Historic Preservation for Sequencing Section 106 (NPA) to achieve compliance with the Nation Historic Preservation Act and formally determine effects on historic properties listed or eligible for listing on the National Register of Historic Places. The proposed Project will have no effect to federally listed species or designated critical habitat. The proposed project would not disproportionately affect minority and/or low-income populations. RD has conducted an independent evaluation of the environmental assessment and believes that it accurately assesses the impacts of the proposed project. No significant impacts are expected as a result of the construction of the project. Questions and comments should be sent to RD at the address or email provided. RD will accept questions and comments on the environmental assessment for 14-days from the date of publication of this notice. Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal environmental laws and regulations and completion of environmental review procedures as prescribed by 7 CFR Part 1970, Environmental Policies and Procedures. A general location map of the proposal is shown below.
