

GO STEM Mobile Maker Lab to be at the fair

The Greater Oregon STEM Hub (GO STEM) at Eastern Oregon University is making waves in the education sector by providing incredible opportunities for students and communities in eastern Oregon. With a focus on STEM (Science, Technology, Engineering, and Math) and Career Connected Learning, GO STEM is dedicated to fostering a love for learning and exploration among PreK-12 students.

One of the most exciting initiatives from GO STEM is their Mobile Maker Lab a classroom on wheels that brings high-quality educational experiences to even the most remote corners of the GO STEM region. This innovative approach ensures that curious learners in all seven eastern Oregon counties have access to the wonders of STEM and Career Connected Learning.

In a delightful collaboration, GO STEM has teamed up with an Oregon Museum of Science and Industry educator based in eastern Oregon for the upcoming Morrow County Fair. This partnership promises to bring an extra dose of excitement and knowledge to fair-goers, as they explore the fascinating world of science and technology.

But the excitement doesn't stop there. GO STEM has also secured a sponsorship from Amazon Web Services for this year's fair. This

The GO STEM will have its mobile maker lab on hand for the public to view at this year's Morrow County Fair

partnership will undoubtedly enhance the fair experience, as attendees will have the opportunity to engage with cutting-edge technology and

witness firsthand the incredible possibilities that STEM fields offer.

If you're eager to learn more about GO STEM and

their incredible initiatives, visit their website at www.go-stem.org. For any inquiries, feel free to reach out to them at go-stem@eou.edu. Stay up-

dated on their latest news and events by following them on Facebook at facebook.com/GreaterOregonSTEM.
