Anchor Store

MAIN STREET, GRESHAM

To the Lovers of Good Coffee

We wish to advise you that we have installed in our store a new ROYAL ELECTRIC COFFEE MILL. This machine is equipped with steel knives which cut the berry into uniform clean particles, instead of grinding and crushing it, as by the old method.

All Coffee Mills heretofore used will only crush the berry mutilating the minute oil cells, allowing the Coffee Oil to evaporate, thus impassing the strength and flavor.

By this new process the little oil cells remain unbroken, the essential oil (food product,) cannot evaporate and the coffee thus retains its fine, rich, aromatic flavor in its full strength.

This is one reason why a pound of coffee cut in this mill will make from twelve to fifteen cups more of full strength coffee than will any coffee ground the old way. The lover of Good Coffee finds here a richness of flavor never found in coffee ground in the ordinary way at any price.

Another feature about this Mill is that you may have your coffee cut as fine as the finest sand and it will still be practically free from that fine dust which is produced by the old method of grinding. You will, therefore, always have a clear cup of coffee instead of a muddy effect—a result of using the old style Mills.

Our 25c and 30c Coffees cannot be Excelled

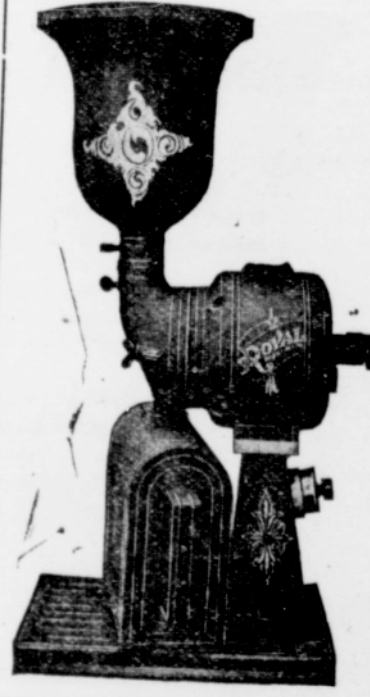

In price or cupping quality anywhere in the county. We have higher priced coffees also and can give you anything you wish in this line.
