### ACROSS THE CONTINENT

Description of recent journey by Rev. J. F. Dunlop.

Continued

Two more places of interest and then we leave the Bay of Fundy for the interior.

The first place is Old Fort Howe built on a high promontory of solid limestone rock overlooking the bay. This fort was built in an early day by the French. The fort still stands high above the city of St. John. The buildings and cannon still remain and look about the same as when I used to play around them when a boy. The greatest curiosity about the fort is a shaft about eight feet square sunk from the top of the hill down through the solid rock for several hundred feet, and although it is a long way from the bay, water comes into the bottom of the shaft and goes out with the ebb of the tide. Why this excavation was made, or the cause of the ebb and flow of the water remains a mystery. Some think this was a subterranean channel to be used as a way of escape in time of war.

The other place is the Isle of Holt up in the extreme Northwest part of the bay. This was the resort of the notorious pirate Captain Kidd. A very exciting book has been written about this island and the movements of Captain Kidd. It is believed by many that this was the place of much hidden treasure. Many have spent time and money trying to uncover it. It is said that some have been successful and be-

came suddenly rich.

We leave the bay and go up the Kennebecasis for a few miles to the place of my birth. There was little change in the appearance of the country. It was delightful to bath in the old swimming pond and to fish for trout in the old brook, and to remember the old place where one was born and the little window where the sun came peeping in at morn, and to sleep in the old room and to converse with old friends. This was the privilege of the writer.

This part of the country is similar to Oregon in many respects, it being a coast country. Here we find greater extremes of heat in summer and cold in winter. Certain seasons of the year there is considerable fog due to the great icebergs, which are brought down from the north by the Arlic current which comes in contact with the warm gulf stream on the banks of Newfoundland making dense fog.

The people are industrious but like the Oregonian never in a hurry. They seem to get much pleasure out of life, and not anxious to be rich.

The cost of living is about the same as on the Pacific coast with a few exceptions.

After having visited the few remaining friends we knew we bid adieu to country and friends and turned our steps westward, traveling over the Canadian Pacific from coast to coast. After leaving St. John little could be seen for hundreds of miles but shrubs, tree, lakes and rivers, our train stopping here and there to take water, until we reached Montreal, a city of nearly 500,000 people. Probably this is the best city in Canada. We passed through Ottawa where the Canadian parliament buildings are located. This is a magnificent country. Thrift and prosperity can be seen everywhere. I am of the opinion that from Montreal down to Toronto is the most fertile yaft of Canada. We traveled north of Lake Superior, but vey little agriculture
