### FAIRVIEW SCHOOL NEEDS NEW FENCE

FAIRVIEW, April 11.—The article in a recent Outlook referring to the Fairview school, while stating the appreciation of the district in reference to the teaching force of the school omitted one feature about which many citizens of Fairview think there should be something said. Reference is made to the school grounds. While improved in some particular by the schools under direction of the principal Mr. Lent, certain much needed improvements have been neglected by the school board. The old fence which has stood about 15 years

needs to be replaced by a neat open fence. The big cedar posts are rattled off and the fence is quite dilapidated. Also a cement walk is needed along the school grounds. We have a good school building in an attractive location. It is conspicuous and should be made as attractive as possible. The time has come for the school board to act with the council in making Fairview as pretty a home town and locality as possible.

## CLIMB UP

Look over the list of our captains of industry in the United States and note their humble beginnings. Carnegie a telegraph operator, James J. Hill a laborer, Charles Schwab a messenger boy, John D. Rockefeller, a low salaried clerk, John D. Archbold, bartering in a country store, Anthony N. Brady, a clerk in a tea store, Frank Vanderlip a reporter on a Chicago newspaper, A. Barton Hepburn teaching school, Chauncey M. Depew a lawyer's clerk. And so we might go on with the great list of successful business men now recognized as of commanding influence in their spheres. Each formed the Banking Habit early in life always saving a portion of their income. Each a firm believer in the assistance afforded by a good banking connection in climbing the ladder of success. You cannot form the banking habit too early in life or be too careful in the selection of a bank whose business is transacted in a careful conservative manner.
