

FOR BIRD PROTECTION.

Song and insectivorous birds as well as game birds and animals of Oregon must be provided with special refuges and retreats where they cannot be pursued and killed, says T. Gilbert Pearson, secretary of the National Association of Audubon societies, who has just arrived in Portland, coming direct from New York City. The object of his visit is to assist in the work of the Oregon Audubon Society and aid the State Board of Fish and Game Commissioners in securing wider interest in bird and animal protection.

There are plenty of lakes, shore lines, rough mountain regions and other waste places, continues Mr. Pearson, that are of no use for agriculture where these creatures will thrive and increase if protected. The Audubon Society is investigating and seeking out these places with the idea of getting them stocked with birds that will protect our fields and forests from the ravages of insect pests.

Oregon is fortunate in already having four of the largest and best wild bird reservations in the United States, continued Mr. Pearson. Under the Fish and Game Commission other refuges on private lands are being established in various parts of the state. It is very urgent that two or three large reserves be created for the protection of mountain sheep, elk, antelope and mule deer, which are rapidly approaching the point of final disappearance in this state.

Mr. Pearson is a writer of ability. His book, "Stories of Bird Life," has had wide circulation, especially in school work. He is also president of the National Association of Game Wardens and Commissioners which meets in Denver August 30th.
