GRANGE MEMBERSHIP IS FALLING OFF?

Is the grange membership in Multnomah falling off? It would seem so from the reports of the different secretaries, read at the last meeting of Multnomah county Pomona. From those statements it looks as if this county had lost about 200 members within a year, and for this falling off there must be a cause—probably several causes—and something should be done by the membership at large to regain the numbers lost, either by reinstating the delinquents or by the admission of new members. From the reports received it appears that every grange in this county has decreased in membership. There must be some reason for such a defection. If only one or two granges were affected the cause could probably be determined, but where all are affected alike, or nearly so, there must be some reason besides local influences.

One of the causes is the great increase of entertaining features everywhere extant. A few years ago there were few public libraries for the people to draw upon; there were no moving picture shows; there were fewer dances and other amusements and there were less opportunities to get to the city on short notice. All these causes have helped to draw people away from the grange and have prevented the acquisition of new members, especially among the young people. The grange has been a moulder of public sentiment. The sentiment has been created and many reforms that improved conditions which come from a sudden wave of excitement are short lived and that we usually find the other extreme follows. So it is more than probable that the present depression in grange circles is but the evidence of a spent enthusiasm, and that there will be a reaction in a short time.

The strength of the grange and its wonderful influence in and out of our legislative halls are largely due to the well-established policy of sober and permanent reform, giving business and other affairs ample time and preparation to adapt themselves to the new conditions. Thus we find that in all of the national grange measures adopted by congress, of which there are many, not one has proven unworthy, and we may justly feel proud of the work of the grange at large.

Throughout this state, and in fact, all over the country, the grange is growing rapidly. The membership in Oregon has increased about 2500 during the past year. It is only in eastern Multnomah that its numbers are decreasing, a condition that is not without a cause and a remedy.

It is noticeable that the loss in membership is principally among the younger members and the question arises whether the grange has made its meetings attractive enough to hold them. The older members who sit around and talk crops and other important matters are not

congenial companions for the boys and girls and they naturally seek some other kind of entertainment. What will the granges do to keep them in the fold?

The Turks must have about concluded that the Balkanians really meant it.

Three dollars a days isn't much for men comprising a legislature, but with many of them it is a great deal better than nothing.

It is not because of lack of appreciation of Washington and Lincoln that their February birthdays are not celebrated much.

Since Governor Wilson doesn't know yet who will be in his cabinet, it is a waste of time and effort for any of the rest of us to guess.

Another judge sentenced an editor a noted one, Colonel Nelson of the Kansas City Star, to jail; the people are watching, listening.
