"The Linotype Way is the Way that Wins."

Official paper of the Town of Gresham, Oregon.
Official paper of the Town of Fairview, Oregon.

Entered as second-class matter March 3, 1911, at the postoffice at Gresham, Oregon, under the act of March 3, 1879.

A LESSON IN TEMPERANCE.

With wine banished from the tables of Wilson, Marshall and Bryan there will be a sentiment of astonishment but no protest. The consumption of liquors has been too immoderate of late years, but much less of it has been drunk in public than formerly. In fact the per capita use of spirits has increased, so it is gratifying to note that our national leaders are setting an example that is sure to be beneficial in outward form if not permanent.

It is noticeable that as the saloons are becoming unpopular, and are being more and more avoided, that the business of the wholesalers is growing better. One reason for this is the apartment house system of housekeeping, where as many as thirty families live under one roof. Delivery of liquor to those buildings is not noticed and the man of the family can take his "nip" at home without the fear of being seen about a saloon. He never "boozes" in the accepted sense of that word but he probably drinks more when he buys it at wholesale and has it before him at all times than he did or otherwise would if he bought his daily drams at the corner saloon.

Whatever the conveniences of an apartment house existence may be; whatever economy there is in such homes; whatever protection may result from a score or more of families being huddled together, there is the spread of intemperance to their credit even though they lessen the number of the saloons and the profits of those remaining.

Insatiable greed of the capitalists is doing this, for it has been found that apartment houses are usually good investments. An no wonder, for they are being used to hide vices of intemperance in many things that could never exist in the open life of single homes.

"Overhead expense" is about due on Easter hats, since the umbrella is soon to be laid aside for a few months.

If the dairymen ever get together on their milk problem will the Sherman law require them to "cheese it?"

South Dakota has cut its saloons down to two for every 600 of population. Looks like a good thing for monopoly. Maybe some of the "interests" had the law passed for their own benefit.

Sheriff Word is to be commended in his arrest of a bunch of Portland hoodlums at a Gates' Crossing dance on Saturday night. Dances in the country are usually free from such vermin and perhaps they have learned a lesson in morality.

Portland papers are now talking about the useless cost of distributing milk and think there should be some regulations provided to lessen the expense. Why not make the milk business a public utility and give the soap box orators a chance to tell us how to operate it?

It is a trifle saying that you will never get what you want unless you ask for it. Medford owes its present supremacy largely to the fact that the city boasts a commercial club that is never afraid to ask for what it wants—and usually gets what it wants. A wide-awake commercial club is invariably the mainstay and backbone of a progressive city.—Jacksonville Post.

There are yet many thousand acres of public land subject to entry and the filing will be continued until not only the best but all of it is entered. Claims that had no value a few years ago have grown into value and entries that were scorned are now coveted. Some day Grant county will see all of the land entered and at present rate at which they are being entered will consume no great time.—Canyon City Eagle.

Three and Seven Acre Farms for Poultry.

J. L. Bray of Albany wrote Prof. James Dryden of the Oregon Agricultural College, "Please send facts about the 7 acre or 3 acre success. We are beginners and want to succeed." Prof. Dryden replied as follows:

"It is possible to make a living or money on a small tract of that size under favorable conditions. I do not recommend the place as small as 3 or even 5 acres for poultry keeping if the proposals to make a living for a family by selling the product at so much a dozen for the eggs, and so much a pound for the chickens, but if the poultryman can work up some special line of breeding stock, that is, if he can get more than market prices for our product, he can make a living on a few acres with fowls alone. Where you sell the eggs by chickens on 3 acres, or even 5, to make a permanent success of it.

"That is, you can, probably, on most kinds of soils and in the climate that we have in the Willamette Valley, keep 100 hens to the acre and they will bring in a profit, with good management, of about \$1.50 a hen above the cost of feed. That is, after paying for all the feed they eat there should be about \$1.50 left to pay for labor, etc.

"If the soil is of light nature, that is, rather porous and light, you can keep more than 100 to the acre. The trouble in over-crowding the ground is, in a few years the soil becomes contaminated with the droppings, and it sooner or later results in unhealthy stock, decrease in vitality and greater difficulty in hatching and raising the chickens.

By keeping 100 hens to the acre and then growing other stuffs with the chickens, using half the ground each year for growing some kind of crop and rotating the chickens and crops, it is possible to keep the ground in a better sanitary condition and to continue the business successfully. The 4 acre place I mentioned from which over \$6,000 worth of poultry and eggs were sold in a year, had very light soil and was in a climate where there wasn't as much rain as here. The owner made additional revenue by selling breeding stock and eggs for hatching."

Are You Constipated?
If so, get a box of Dr. King's New Life Pills, take them regularly and your trouble will quickly disappear. They will stimulate the liver, improve your digestion and get rid of all poisons from your system. They will surely get you well again 25c at all Druggists.

The debating society at Franklin has discussed the question, "Resolved, That the young man of today has better financial opportunities than the young man of 50 years ago." The decision was in favor of the affirmative.

You can say goodbye to constipation with a clear conscience if you use Chamberlain's Tablets. Many have been permanently cured by their use. For sale by Gresham Drug Co., and Dealers everywhere.

IDEAS FROM EVERYWHERE.

But there is going to be a Wilson in the cabinet anyway.

Poor old New England didn't get a piece of the big cabinet pie.

Which boys and girls are going to have the earlier and better gardens?

The presidential chair will have a comparative rest for the next four years.

First kicks against Wilson will be made over the cabinet; he must displease many.

Most of the new members of the new cabinet are about the same age, a little past 50.

Whatever the legislature has done or not done, Oregon will prosper more and more.

Again Oregon is lucky and happy; the river and harbor bill wasn't beaten, after all.

Easter; St. Patrick's day; baseball; O yes, we can nearly forget the late legislature.

Likely it is quite agreeable to our distinguished friend, John Barrett, to be a democrat again.

Bryan probably has made somewhere a red ink memorandum, just a date "March 4, 1916."

Don't despise the person who tries to write a spring poem; he means well, and might do worse.

Three adjoining states get three cabinet members, but they contain well toward 20,000,000 people.

It seems reasonable to suspect that some members of the legislature are sorry they were elected.

It sometimes happens that the girl with the dreamy eyes is wide awake and on the job.

The three degrees in medical treatment—positive, ill; comparative, pill; superlative, bill.

Man prefers hard labor in prison to contributing to support his wife. Apparently he doesn't love her any more.

The country hopes, and believes, that Mrs. Woodrow Wilson does not look at all like some published pictures of her.

Internal revenue reports show that drinking and smoking are greatly on the increase in this country. The drinkers and smokers are doubtless among the loudest complainers about the increasing cost of living.

An apple day covering the whole Pacific Northwest is in prospect. Portland held three apple days last week that were successful and they led to a wider use of this favorite fruit. It is suggested that some date about the first of April be selected. The idea is being taken up by Washington commercial clubs.

The first short course for farmers and stockraisers ever held by the Oregon Agricultural College away from Corvallis has lately been finished at Burns, which aroused that part of the state to the benefit of this work. The interest was high and the attendance large. The subjects treated were stockraising, general agriculture and domestic science. One family rode nearly 100 miles in a wagon to attend and great good resulted from this "missionary" work by the college. All went away very much interested and highly appreciative of the work done.

RESOLUTION.

Be it Resolved by the Common Council of the town of Gresham that W. F. Honey, H. German, and John Fieldhouse, being three disinterested freeholders of the town of Gresham, no kin to any owner or person interested in any of the property to be appropriated and possessing the qualifications of jurors of the Circuit Court of the State of Oregon for Multnomah county, are hereby appointed viewers to view a proposed street in the town of Gresham and to make an assessment of damages and benefits for the opening of said street. The proposed street lies 356 feet west of and parallel to the west line of Main street and extending from the south line of First street to the north line of Fifth street and being 40 feet in width.

The 25th day of March, 1913, at 10 a. m., is hereby fixed as the day, and the office of D. M. Roberts of Gresham, Oregon, as the place, for said viewers to meet.

Dated, this 4th day of March, 1913.

LEWIS SHATTUCK, Mayor.
Attest: D. M. ROBERTS, Recorder.

WANT ADS.

1c a word the first insertion; one-half cent a word each subsequent insertion.

The Best Light

AT THE LOWEST COST

ELECTRIC LIGHT is the most suitable for homes, offices, shops and other places needing light.

ELECTRICITY can be used in any quantity, large or small, thereby furnishing any required amount of light. Furthermore,

ELECTRIC LAMPS can be located in any place, thus affording any desired distribution of light.

NO OTHER LAMPS possess these qualifications; therefore, it is not surprising that

ELECTRIC LAMPS are rapidly replacing all others in modern establishments.
