"The Linotype Way is the Way that Wins."

Official paper of the Town of Gresham, Oregon.
Official paper of the Town of Fairview, Oregon.

Entered as second-class matter March 3, 1911, at the postoffice at Gresham, Oregon, under the act of March 3, 1879.

MAKE THINGS ATTRACTIVE.

Gresham as a picnic town is becoming known and there will be other societies from Portland seeking to secure our fair grounds for their events. Such parties will be encouraged as they enliven the town and each one helps to advertise the fact that this is the nearest and most attractive place within easy reach of the city. With this prospect in view the fair association should make an effort to have the grounds in better shape next time. Their condition on the Fourth was not inviting enough, yet there was some excuse considering that it was the first occasion of the kind and the previous bad weather had been somewhat discouraging. The money taken in for rent of the grounds could be used to good advantage in making them more attractive.

OUR TIMBER RESOURCES.

Cruising of timber lands in various counties of the state, by direction of the county courts is showing that the lumber resources of Oregon are more than double the estimates heretofore made. The object is to get more taxes out of the big timber holding corporations, but the result shows a greater wealth than was heretofore supposed. In Clatsop county the reports are astonishing. In one township of only six miles square the cruising raised the timber estimate from 201,000,000 feet to 801,588,000 feet.

Similar results are reported in Clackamas county but not every township can show such a gain in either county. The results, however, are encouraging and lead to the hope that the taxes on other property will be proportionately decreased.

BASEBALL INCREASING.

Baseball is taking a stronger hold of the public this year than ever before. All over the country are to be found good teams such as are read about in this vicinity. Portland has a dozen or more clubs, all first class as brush leaguers go, and they are all capable of putting up a game of ball that is fully as interesting as that of the major leagues except that they are of less importance.

The clubs of this vicinity are all putting up good ball and there are six or seven that the minor teams of Portland are glad to meet at any time. At the head of the country teams is Fairview's Sun Dials, with clubs of scarcely lesser importance at Pleasant Home, Sandy, Estacada, Barton and Boring. Such a galaxy of ball tossers is something unprecedented in this part of the state and shows a healthy condition of the national game. The only regret is that Gresham is not included in the list.

It is from the brush leagues that the great players come. They must first learn the game at home and when they become so proficient that they attract attention they are picked to become the diamond heroes of the nation. Such clubs as we have right here are drawn upon for high salaried players and who knows but some future famous ones are being developed here this summer.

The games in this vicinity are as good as the average anywhere, as the scores show, and should be more fully reported in the papers. The Outlook is eager to boost them all but must depend on outside assistance for reports in most cases. That the Sun Dials is attracting the greatest attention is due to the liberal management and energy of E. C. Morrison, who is not afraid to spend a few dollars in promoting the sport by securing the best players, engaging games with the best clubs from Portland and then advertising them in advance. That he is able to charge an admission to the games is due to the fact that he is furnishing an entertainment that is worth the money.

Library Notes

For the Amateur and Professional Dairyman.

J. W. Decker's Cheese-making has been a standard book on the subject and has been used in American Agricultural Colleges in which there are special courses in cheese-making. Among some of the subjects discussed are: cold-curing and paraffining of Cheddar cheese, use of acidimeter, Hart's test for casair in milk, a synopsis of defects in American cheddar cheese; manufacture of Camembert, Gouda, Italian, potted, sage and other kinds of fancy cheese. Also Swiss, Brick, Limburger, Edam, Cottage and soft cream cheese are taken up.

E. H. Farrington's Testing Milk and Its Products, is a manual for dairy students, creamery and cheese factory operators, food chemists and dairy farmers.

C. B. Lane's Business of Dairying demonstrates how to conduct dairy farming for the largest profit. The soil, crops, the dairy herd, feeds and feeding, products and sales are each given in detail.

C. H. Eckles' Dairy Cattle and Milk Production takes up the different types, their care and management.

S. D. Belcher's Clean Milk describes the cow yard, pasture, barn, dairy room, ice house, utensils and bottling of the milk. A good introduction is given by Wm. H. Park, Professor of Bacteriology and hygiene in the University and Bellevue hospital Medical College.

Ernest Mathews was requested by the proprietors of Country Life to write for them a book on dairy farming, Economics in dairy farming was the result. Mr. Mathews has had ten years' experience with butter test and milking trials so gives us the benefit of his experience on the question of manufacturing milk.

These books and many others upon similar and other subjects are at the Gresham Library or may be obtained by request through Miss Haile, the librarian.

Progress Made in Oregon Farm Development.

At the annual convention of the Oregon State Bankers' association, held recently at Corvallis, the progress made in agricultural development and education during the past year was carefully reviewed. Reports from all over the state indicated that the effort made last season to interest the school children as well as their parents, had met with remarkable success, enabling the association to hold fairs in every county in the state except two at which the various articles made and the products grown by the children were exhibited. At these county gatherings the finest specimens were selected and forwarded to the state fair at Salem, where the children were awarded prizes in an amount aggregating \$20,000.

It was pointed out that under the provisions of Senate bill 72, passed at the recent session of the legislature, the counties of the state are authorized to provide an unlimited amount of money for the purpose of carrying on educational farm work and to pay the salaries and expenses of field agents, with a further provision that appropriations made by the individual counties will be duplicated by the state. From the splendid reports coming in from all over the state to the superintendent of Public Instruction and to the Agricultural college, the Bankers' association was convinced that it could not afford to discontinue their support of the movement until such time as it could be taken over and carried forward by the state.

MILWAUKIE TAXPAYERS WIN THEIR CONTENTION

MILWAUKIE, Or., July 8.—(Special)—The board of directors held its regular meeting last night at which time two more teachers were employed, making eleven in all for the ensuing year. While the vote of the taxpayers was that a 9-months term be taught the district will be called on to pay the teachers for 10 months as they had already been hired and contracts signed.

J. W. Gracie, member of the board said today that the teachers will claim salary for the ten months.

The directors ascertained from the state superintendent that the taxpayers have the authority under the law to decide the number of months to be taught, but this decision will not affect the teachers for the ensuing year as they are under contract for fully ten months and provisions have been made to pay them for ten months although they will teach nine months.

The state superintendent upheld the directors in their contention that they can elect teachers when they see fit.

The taxpayers voted to instruct the directors that they must not elect the teachers until after the annual meeting. On this point the directors won out on their appeal, but it is bare victory, as they had already elected teachers for the ensuing year.

The Milwaukie district will present each of the teachers hired before the last meeting with one month's salary, and a total of \$1000 for all the teachers hired. It will not be decided until a year hence that nine months term is better than ten. L. H. WELLS.

PORTLAND MARKETS.

Grain, Flour, Feed, Etc.

WHEAT—Track prices: Club, 90-92c; Buestem, 95-97c; red Russian, 90-92c.

Rid Your Children of Worms.

You can change fretful, ill-tempered children into healthy, happy youngsters, by ridding them of worms. Tossing, rolling, grinding of teeth, crying out while asleep, accompanied with intense thirst, pains in the stomach and bowels, feverishness and bad breath, are symptoms that indicate worms. Kickapoo Worm Killer, a pleasant candy lozenge, expels the worms, regulates the bowels, restores your children to health and happiness. Mrs. J. A. Brislin, of Elgin, Ill., says: "I have used Kickapoo Worm Killer for years, and entirely rid my children of worms. I would not be without it." Guaranteed. All druggists, or by mail. Price 25c. Kickapoo Indian Medicine Co., Philadelphia and St. Louis.

European countries, as well as those of South and Central America, don't like Uncle Sam much, either, it seems, perhaps, because they realize that they wouldn't dare to try to lick him if they wanted to, even if he hasn't much of an army and not a very big navy.

Electric Light is the most suitable for homes, offices, shops and other places needing light.

ELECTRICITY can be used in any quantity, large or small, thereby furnishing any required amount of light. Furthermore,

ELECTRIC LAMPS can be located in any place, thus affording any desired distribution of light.

NO OTHER LAMPS possess these qualifications; therefore, it is not surprising that

ELECTRIC LAMPS are rapidly replacing all others in modern establishments.
