High Fertilizer Value of Spoiled Hay.
 "Every acre of this spoiled hay, then, that is applied to the land will permit the raising of three 30-bushel wheat crops, or five 40-bushel oat crops or 200-bushel potato crops or three 600-bushel apple crops without any depreciation in the fertility of the soil," is the astounding statement made by Prof. H. D. Scudder, agronomist of the Oregon Agricultural College in discussing the farmers' most pressing problem of the best disposition to make of spoiled hay. Professor Scudder continues the discussion as follows:
 "A ton of clover hay contains 40 pounds of nitrogen, five pounds of phosphorus and 30 pounds of potassium. If this amount of plant food was to be purchased on the market as fertilizer, it would cost not less than \$8.50 and probably closer to \$10.50, depending upon the form of fertilizer. Since a good average field of vetch and clover would yield for the first cutting this year about three tons per acre, the actual fertility value at the lowest market price for these three plant foods alone, contained in the spoiled hay on the average acre of clover land is \$21.50. Clover hay that has become spoiled for feed has lost little or non of these fertility elements, and hence every ton of it that can be returned to the land is worth not less than \$10 to \$15 and every acre with three tons of this spoiled hay carries a value of \$30 to \$45 if properly utilized.
 "The folly of letting this hay lie or burning it up can be seen at a glance. It should be hauled to the barnyard and thrown in deep piles just as is the manure. In other words, it should be composted, or allowed to rot. If it inclines to 'firefang' it should be wet down a little. When the fall rain comes it will rot down and be ready to spread on the land in the following winter. In many cases this hay can be hauled off the meadow and spread at once on the stubble field or pasture that is to be plowed this fall. Before plowing it should be thoroughly disked so that it will be chopped up and mixed with the surface soil.
 "Every ton of it contains as much plant food as is taken away from the barn in 30 bushels of wheat, or 66 bushels of oats, or 200 bushels of potatoes, or 600 bushels of apples, or in one ton of fat hogs, or four tons of milk, or 10 tons of butter."

DEVELOPMENT LEAGUE TO VISIT EASTERN OREGON

In order to arouse interest in the meeting of the Oregon Development League to be held August 19-21 at Klamath Falls and to personally carry a cordial and urgent invitation to the business men and ranchers to attend that convention a party representing the Portland Commercial club, the railroads and the news papers is now making an automobile tour of Central Oregon and will devote all of next week to a series of meetings for the purpose of securing delegates to the O. D. L. gathering. The party left Portland last Sunday for Bend, the latter being the real starting point of the tour, being preceded by a letter addressed to every commercial organization in the territory to be covered giving the itinerary in detail. This advance notice will enable each community to make preparations for a large attendance at the meetings to be held on arrival of the party. It is hoped that the excursion will result in securing information which will enable the Oregon Agricultural College and the Portland Commercial club to help Central Oregon in the development of its resources.

GRESHAM CITIZEN STARTS SOMETHING
 A street-cleaning campaign was inaugurated this afternoon by Chas. Cleveland. He appointed himself street commissioner and began operations in front of the Sanitary market. With a street broom and a shovel and assisted by Dad Peterson with a wheelbarrow, Mr. Cleveland soon had a neat space in front of the butcher shop extending to the center of Main street.
 There the contagion began to spread and Cleveland got busy financing the project. In a short time he arranged a system of payments, ranging from ten to fifteen cents per front and Dad was given the contract to haul the refuse to the gulch.
 The idea was such a good one that four firms fell for it at once. Halligan's barber shop, The Sanitary Market, Palmquist's harness store and Hessel's Machinery emporium were the first four to join in the crusade for clean streets. Others are to be rounded up by the self-elected street commissioner and there is a probability that some parts of Gresham will get clean streets on short notice.
