### EXHIBIT BUILDINGS UNDER CONSTRUCTION

Dr. J. N. Powell, who is here from San Francisco, has been a close observer of the progress of the Panama exposition buildings. Speaking of them yesterday to the Outlook he said:

Based upon a review of the entire construction to be undertaken in the completion of the Panama-Pacific International exposition, the construction of the main exhibit section is now, according to a statement just issued by Mr. Harris D. H. Connick, director of Works, more than two-thirds completed. This includes an enormous amount of work done in the preparation and grading of the site, the removal of buildings, the laying of conduits, and other underground work for gas mains, water pressure systems, pipes, etc.

Ten exhibit buildings are now under construction and bids for the Palace of Horticulture have been awarded. More than seventy million feet of timber will be used in this main section and a fleet of thirty steamers is employed in bringing in the cut of thirty-two mills. The Service building is completed and occupied; the Palace of Machinery is eighty per cent completed; the flooring of all the other buildings is far advanced, and in a number of cases the raising of the frame work has begun. All buildings are being constructed under definite time contracts, with a bonus for completion within the time limit and a penalty for over time. Director of Works Connick says that the buildings of the exhibit section will be completed if anything before the limit set by the exposition, June 25th, 1914. This early completion will allow ample time for the installation of exhibits and the adornment of the grounds.

### Avoid Sedative Cough Medicines.

If you want to contribute directly to the occurrence of capillary bronchitis and pneumonia use cough medicines that contain codeine, morphine, heroin and other sedatives when you have a cough or cold. An expectorant like Chamberlain's Cough Remedy is what is needed. That cleans out the culture beds or breeding places for the germs of pneumonia and other germ diseases. That is why pneumonia never results from a cold when Chamberlain's Cough Remedy is used. It has a world wide reputation for its cures. It contains no morphine or other sedatives. For sale by Gresham Drug Co. and all Dealers.

### BOOSTERS WANT CITY CAR LINE

PORTLAND, Oct. 2.—(Special)—The East Side Business Men's club has just started a movement for a municipally owned street car system for Portland covering 100 miles of track on both sides of the river.

Of this trackage 50 miles will be on the East Side and will run eastward from the Willamette river to the city limits; 25 miles will be cross town car lines running north and south; 25 miles will be for the West side and for a belt line. Cost of construction is estimated at \$40,000 per mile or a total of \$4,000,000. A map has been prepared showing the routes of these lines and they cover the East side completely and especially the cross-town lines.

The club has asked of the mayor and city commissioners a public hearing on the merits of this proposition. Owing to the reluctance of the Portland, Railway, Light & Power company to build lines where needed, says the communication to the city commissioners, resort is had to this movement for municipally owned car lines system in Portland, the same as has been started in Seattle and San Francisco. If the commissioners decide to consider the matter it will mean a long and bitter fight.

### Fairview

FAIRVIEW, Oct. 2.—A. G. Fitzpatrick and wife of California have been the guests of their cousin, George Burlingame and family.

The concert which the Ladies Aid society were planning on giving in the near future, has been indefinitely postponed owing to the illness of Mrs. O. J. Brown, who was taken to a Portland hospital on Thursday to undergo an operation.
