WRITING A CHECK

"Just wait a minute and I'll write a check for it"

Say this to yourself and see how good it sounds. A prominent business man says that the proudest act of his life was the writing of a two-dollar check, to pay for a hat, when he was fifteen years old.

There is a certain satisfaction in signing your name to your first check that cannot be compared with any other feeling of elation.

THINGS TO REMEMBER.
Write legibly. Never leave any room for doubt as to the amount and the person it is to be paid to. If there is any doubt in the mind of the teller as to the amount of the check as shown by the figures he always goes by the amount written out in full in the body of the check.

A check must be endorsed just as the name is written on the face of it. If the name is incorrectly written on the check it should be endorsed to correspond and the correct endorsement written right below the first one.
