JUNIOR LEAGUE TO BE FORMED

Plans are maturing for the formation of a Junior Civic Improvement League under the auspices of the Women's club. The committee which was appointed to undertake the work, as reported in a recent number of the Outlook, has been at work and has planned for several interesting meetings in the near future. The first will be an exhibit at the library, which will interest old and young, on February 9. This will show by pictures what has been done in various places to beautify home surroundings by carefulness in keeping them neat and by cultivating flowers and vines. On the following afternoon there will be a meeting to organize a league. An effort is being made to get Professor Sweetzer of the University of Oregon to give a lecture on the wild flowers of this section. It is hoped to have the juniors make a study of the wild flowers in this vicinity and sometime during the summer give an exhibition. Home gardening and general improvement will be taken up and badges or buttons of honor be awarded for merit. Arbor day, May day and a June exhibit are being planned for. Principal Stubbs of the school encourages the plans and has promised his hearty co-operation.

FAMOUS CURVE MAY BE STRAIGHTENED

An effort will be made to eliminate the famous S curve on the Section Line road in front of the Dr. Powell home and site of the new automobile factory now in course of construction. Those who are familiar with the road have noticed that it makes a peculiar twist, and as there is now an opportunity to straighten it out the work of doing so would be satisfactory to everybody concerned. At the foot of the hill where the road bears north it should continue straight ahead to the southwest corner of Regner's addition where it would again intersect the present road with only a slight curve at that point. The owners of the property affected are J. N. Clanahan and Mrs. Jennie Sales, both of whom are willing to have the change made. The road would be straight and their property lines and corners would be straight and square and everybody would be satisfied and benefited. The change would have no effect on the new auto frontage, except that it would have a square frontage which is now lacking. An effort will be made to have the county authorize the change.

WRITING A CHECK

"Just wait a minute and I'll write a check for it" Say this to yourself and see how good it sounds. A prominent business man says that the proudest act of his life was the writing of a two-dollar check, to pay for a hat, when he was fifteen years old.

There is a certain satisfaction in signing your name to your first check that cannot be compared with any other feeling of elation.

THINGS TO REMEMBER.

Write legibly. Never leave any room for doubt as to the amount and the person it is to be paid to. If there is any doubt in the mind of the teller as to the amount of the check as shown by the figures he always goes by the amount written out in full in the body of the check. A check must be endorsed just as the name is written on the face of it. If the name is incorrectly written on the check it should be endorsed to correspond and the correct endorsement written right below the first one.
