How About Your Future?

A NEW YEAR lies before you—another twelve months of fresh opportunities. No matter what the old year brought for you, this year comes with fresh assurance of success—with new chances to "make good." But what you accomplish—how you use these opportunities—is entirely a matter for YOU yourself to determine.

If you like your present work—you are probably in the right line. Stick to it—and train yourself for a job higher up. If you don't like your work—if it offers you no chance for advancement—it's a safe guess that you are in the wrong line. And you had better look about you—and find out what work you do like—where your natural ability lies—and then train yourself along that line.

No matter how little progress you've made this year—whether you are in the right or the wrong line of work—if you will make up your mind to do it—with the help the International Correspondence Schools can give you—you can wring success from the next twelve months.

For 22 years I. C. S. has been assisting men to get into lines of work for which they were best fitted—have been helping them to train and develop their natural ability—to qualify for better positions and bigger salaries. They can do the same for YOU, no matter where you live, what you do, how limited your education, or how little spare time you may have. Just mark on the coupon the position you would most like, and mail the coupon to the I. C. S. Without obligating you in the least they will show you how they can train you for this job in your own home during your spare time.
