WHETHER your painting is an investment or an expense depends on what paint you buy. Don't buy paint that has to be prepared by hand. In that case you pay extra for painter's time in mixing. ### OLD PIPE LINE TO BE REPAIRED

The old pipe line between Gresham and the Talbot place on the east, for a distance of nearly a mile has been the source of constant trouble for the past ten years.

Some unknown chemical in the soil is the cause, the invisible element eating its way through the big tube in hundreds of places, necessitating constant repairs.

It has been determined by the Portland Water Board to make thorough repairs and paint the pipe in an effort to make it serviceable for several years more, and to encompass that object a crew of about thirty men will be employed here for about three months.

Tools for the work are on the ground and the task of opening the big ditch has begun.

The new pipe, laid three years ago, was bedded in a foot of sand before it was covered where it passes through that piece of soil, and so far it shows no signs of decay.

**Waterproof Varnish**

The First Varnish on the Market to be Advertised as Waterproof was Chi-Namel.

This Varnish owes its unusual waterproof quality as well as its easy flowing and elasticity, to the large proportion of Chinese Oil made possible to use in its manufacture by the special Chi-Namel method of refining.

This is the same oil the Chinese people use to make their boats waterproof and to give flexibility to the finish on their bamboo ware.
