A New Political Party.

According to Elbert Hubbard, a new political party is going to arise—from out of the needs of the time—a party that will conserve the good in organization, encourage enterprise, stand by both employer and employee, and free business from the political barnacle and the legal hold-up.

"Railroad-raiding and business-rendering by legal experimenters and political gentlemen adventurers have got to stop, or our whole civilization will be in the ditch, and the day will be hastened when Macaulay's native New Zealander will sit on a broken arch of Brooklyn bridge and contemplate a civilization dead and returned to dust."

This is a very pessimistic view, for nothing of the kind will ever happen as the result of political upheavals. Each generation will be an evolution from the preceding one, and each one will work out its own salvation.

To arouse greater interest in their plans, the officials of the land show to be held in Portland next fall will offer a first prize of \$200 and a second prize of \$75 for the best special exhibit by counties. ASSESSOR REED REPORTS COLLECTIONS

June was the banner month in the county assessor's office for tax collections and sale of blue prints. Assessor Reed's payments to Treasurer Lewis for the month were \$5936.36 for taxes and \$31 for blue prints. The largest single item was \$3735.99 paid by the estate of Jacob Kamm, which was recently closed.

Total collection of taxes by Assessor Reed since June 1913, have been over \$14,000. These taxes are derived mainly from estates in probate bankruptcies, itinerant merchants, and storage stocks of non-resident firms and corporations. They are nearly pure gain in the way of revenue as the actual cost of collection is small, the work being done by the regular deputies of the office. Prior to 1913 they were not collected and the county lost thousands of dollars annually.

Assessor Reed's payments to the treasurer account sale of blue prints makes an especially good showing. The total for the 16 months from January 6, 1913, to July 6, 1914 was \$147.75 as compared with \$126.50 paid by the assessor's office for the seven years between January 1, 1906, and December 31, 1912.

The Banking Habit

is universally conceded to be a good habit, and a good habit has been defined by someone as

"YESTERDAY'S ACHIEVEMENTS TAKING THE STING FROM TODAY'S TOIL"

This definition states the exact truth, based upon the experience of thousands of depositors throughout the world.

While you are forming this exceptionally good habit, you are accumulating a fund for future use. Life is worth living when you have money in the bank—it gets monotonous when you are broke.
