Wins Good Position.

John Martin, an O. A. C. graduate of 1914, has been appointed to a position in the cereal crop investigation branch of the United States Department of Agriculture. He has been assigned to cereal breeding, crop rotation and seed selection work in the experiment station at Newell, South Dakota, at a salary of \$1440 per year. He won this prize position by his ability as a student, his experience on the farm in summer and in a seed store in winter, and his splendid showing in the competitive examination. His average grades throughout the four years of his college work was almost 95. In the federal examination he met 110 competitors from many different parts of the country, and was one of the 30 to make a passing grade, being one of the very highest. He prepared for college and for his bright career in the schools of Albany and in the farming and mercantile industries of that section.

Egg Record Stands.

"At this moment a million hens are in training to beat that record," said an eastern poultry journal a few months ago in speaking of the record of 303 eggs in a year made by the O. A. C. hen C521. From reports of the two laying competitions at the Missouri and Connecticut stations it now looks as though the record may not be beaten this year. On August first no hen had made a record equalling the Oregon hen and it hardly seems possible now that any of them can overtake her.

Home Cooking Restaurant.

A regular dinner will be served every day from 12 to 2. Short orders at any time. Having taken over the restaurant formerly conducted by Mr. Peck I would be pleased to retain his patronage and will endeavor to merit that of the entire public.
