This meeting will be held at Spokane at 10 a. m., on November 19, in connection with the seventh annual apple show. The investigating committee which was appointed at the conference held at Portland some weeks ago is unanimous in its belief that there will be an out-let for all the by-products that can be produced in the fruit section of the Northwest and at the coming conference the committee will report its findings and make suggestions as to future action.

All growers' associations are entitled to representation at the coming convention as also are commercial organizations that have given the preliminary plan financial aid.

**Not Worded the Same.**

Just as the family was about to sit down to the evening meal the minister unexpectedly dropped in and was asked to join them.

When the maid set the table she had turned the plates bottom side up. Written on the bottom was the name of the manufacturer.

The minister was asked to say grace, and as he did so he reverently bowed his head above his plate.

When he had finished the little five-year-old daughter of the house picked up her plate, looked at the manufacturer's name closely and said:

"Papa, it doesn't say that on my plate."—Ladies' Home Journal.

**Tiny Goust.**

The republic of Goust is a square mile in the Pyrenees which for the last three centuries has been recognized by Spain and France as independent. It has a population of about 150 weavers. They are ruled by a council of elders and pay no taxes or duties of any sort. This civic unit is so tiny that it has to go abroad for its cure of souls and body, for it has neither physician nor priest, for these needs it has to go to Laruns, the nearest French town. Even the dead must leave Goust to find consecrated ground in which to lie, the coffins being slid downhill and thus out of the smallest republic in the world.

**Moist Bombay.**

**Veterinaries.**

Hippocrates, the "father of medicine," wrote a treatise on the veterinary art, but its true founder was Vegetius, who wrote "De Arte Veterinaria," 300 A. D. But the first attempt to elevate the practice into a science was as late as 1761, when France set the example of establishing the first veterinary college at Lyons.—Exchange.

**Malta Fever.**

There is no connection between Malta fever and yellow fever. Malta fever is peculiar to the island of Malta, where it has been endemic for an indefinite period. It is believed to come from the milk of goats.—St. Louis Times.

**Baseball in Alaska.**

Under conditions probably more unusual than anywhere else in the world is baseball played at Ketchikan, Alaska, where the only level stretch of land suitable for grounds is along the ocean edge. Consequently the games must be played at low tide, for nearly twenty feet of water cover the home plate when the tide is at flood.—Argonaut.

**Kings Classified.**

A note in the Springdale items throws some light on the subject of opening a new road across the country to the section beyond the Sandy river. The business men of Gresham should take the matter up with the county, as it means "considerable more trade." The Outlook has agitated this question before but nothing came of its efforts. Will someone get busy?

Best Cough Medicine for Children. "Three years ago when I was living in Pittsburgh one of my children had a hard cold and coughed dreadfully. They do not object to taking it," writes Mrs. Lafayette Tuck, Homer City, Pa. This remedy contains no opium or other narcotic, and may be given to a child as confidently as to an adult.
