There may be other systems that will be better than the bond for building permanent roads but so far we have failed to work them out. Time possibly will evolve a better plan. In the meantime, let us use the best means at hand and boost for the bond issue.

Another thing that is of vast importance to farmers of this country is a system of rural credits. The grange is after it. Everybody get busy and help to get action through our representatives in congress upon this most important matter.

VENTURA PARK

There will be a fountain in the center and the little house will be fitted with couch, tables, etc., where the Smith expect to spend the hot days of the coming summer.

The Keenes expect to leave in a week or so for eastern Oregon where Mr. Keene is interested in an irrigation project. The land to be supplied with water lies just east of Mt. Hood, from which the stock company plans to get their water. One thing the company deserves great commendation for is that they are planning to hire only married men during the coming season, as men with families deserve the first chance to secure work. We wish Mr. Keene the success he deserves in this undertaking.

The entire Benson family have been in the grip of the gripple! But that can also be said of most of the families in our community.
