NEW COMBINATION, PIPES AND POETRY

Smoking by conductors and motormen is prohibited in the cars, but when there is a short wait for connections, as happens at Linnemann Junction several times a day, the smoking crews take advantage of the brief respite to steam up.

Some of the ladies who have to wait for transfers or connecting cars down there noticed the condition of affairs, and one of them who is gifted as a poetess wrote the following verses which were presented to the boys as a gentle reminder. Accompanying the poem were cute little pipes, holding just about two whiffs, and the suggestion as to their use was contained in the rhymes:

We give you these pipes, along with the rhyme,
As a reminder that you can save time,
While attending the social function,
Held at the station called Linnemann Junction,

By laying aside those huge Missouri meerschauts
Filled with cabbage leaves, grown near Gresham
And smoke these briars, dainty and sweet,
Holding a few puffs, but hard to beat.

You can smoke these pipes, and go on your way,
And get us all home before the close of day.
So take a hint from those who know,
A smoke's all right but excess don't go.

I hope you will see the moral of this rhyme
And let this car make schedule time,
For the want of food we daily grow thinner,
And would like to get home once, in time for dinner.

Inasmuch as no family can adequately maintain life on less than \$600 a year, why should the saloon be allowed to prey on a population already underfed and insufficiently clad? Professor Ryan, author of "A Living Wage," claims that at least 60 per cent of male workers in the cities of the United States are receiving less than a sufficient sum to keep their bodies well nourished and efficient.

Shipping Butter by Mail.

Considerable interest is being taken by local buttermakers in the subject of sending butter by parcel post. It has been proven that under proper conditions butter may be sent directly to patrons in the city, thus bringing an increased price to the producer and insuring fresh butter to the consumer.

Special care is required in packing butter for shipment so as to prevent damage to other mail. It must be enclosed in an inner cover and a strong outer cover of wood, metal, heavy corrugated pasteboard or other suitable material, and wrapped so that nothing can escape from the package.

Where it is possible to send more than one roll of butter in a package, considerable saving will be made in the matter of packing and postage.
