The United States supreme court upholds the validity of the Oregon and California land grant and reverses Judge Wolverton who decreed its cancellation.

The Oregon counties that have lost nearly a million dollars in taxes in the past two years may now get some of their revenues back.

Politicians and land sharks who have been profiting by the agitation against the O. & C. land grant will now have to go to work on new lines politically.

All well-informed lawyers knew the land grant could not be taken away from the railroad, although the railroad managers were guilty of censurable practices.

Still all that was over done by the holding corporation has been done under the acts of congress, court decisions and rulings of the land department.

The 2,300,000 acres involved are left to be disposed of by the railroad company, subject to future congressional regulations.

POWELL STREET

POWELL STREET GULCH FILL IS PROGRESSING

Powell street gulch is being filled at a rapid rate with dirt taken from the gravel pit. The old bridge timbers have been taken out on the north side of the street, leaving a roadway open on the south side. When the north side fill is completed it will be used while the other half is being filled. John Metzger is making plans for a cement sidewalk in front of his property facing the fill.

Home Made "Logan" Juice.

Take clean, fresh ripe loganberries and heat to the boiling point with just enough water to keep from burning; remove from the fire at once and strain through a coarse sack. Take the juice, sweeten with three pounds of sugar to each gallon, set back on the stove and again heat to the boiling point, not letting it boil. Pour into ready cleaned and heated bottles and seal immediately. Common soda or pop bottles are good for this purpose, to be corked and sealed in the usual way. The bottled juice is then set away in a cool and dry place, where it will keep for a long time. When wanted for use it is simply poured from the bottles, diluted to taste, and it is then a fit drink for a prince. Don't let your surplus berries go to waste if you like a good soft drink. Make some of them into juice for table use.

Bids Wanted.

Bids will be received up to Thursday, July 1, at 12 o'clock for the dancing pavilion concession at the fair grounds for the week of the fair, this year.

NO TIME IS LOST ON HARD SURFACING

No time has been lost by the road authorities of Multnomah county in taking advantage of the permission, granted by the people of this part of the state at the recent election, to spend \$1,250,000 in paving county roads. On Monday, June 21, the Warren Construction company signed a contract in the office of Roadmaster Yeon, and three hours later work had been started on the first unit of Sandy road, just outside the city limits. Two days later the finishing coat had been applied to this section and preliminary work on the next unit was well under way. Contracts for paving the Columbia Highway and other county roads were signed the same day and work started with almost equal promptness.

When Railroads Prosper.

"Crop prospects are fine, and with the gathering of the great harvest times ought to become prosperous again," says W. R. Scott, general manager of the Southern Pacific system.

"The prosperity of the country depends to a remarkable extent on the railroads," continued Mr. Scott. "When the railroads prosper, the influence extends to all branches of business and industry. Mines, forests mills and farms all supply greater demands when the railroads are active. When returns on investments are assured, funds for development and extension on railroad lines will be available."

Under opposite conditions, when railroads have empty trains, there are no funds for improvements.

Bank it Day by Day! Don't Drop it along the way.

If you were carrying a bag of gold and should discover a gaping hole in that bag through which a fortune was trickling away—lost to you forever—you would stop up that hole at once.

That's just what is happening if you are not saving your money. A fortune passes through your hands in the course of a lifetime; your future depends on how much you retain. You can't fill a barrel until you stop the leaks; you can't accumulate money to protect and back you until you stop the leaks of extravagance.

It is not what you make, but what you spend, that keeps you poor. The poorer you are, the more need you have for a bank. Today a spender—tomorrow a pauper. You can't afford to take chances.

THIS BANK WILL HELP YOU MAKE GOOD AS A SAVER.
