"The Linotype Way is the Way that Wins."

Official paper of the Town of Gresham, Oregon. Official paper of the Town of Fairview, Oregon.

Entered as second-class matter March 3, 1911, at the Postoffice at Gresham, Oregon, under the Act of March 3, 1879.

SUGAR AND REVENUE.

It is reported from Washington that it will be necessary for congress to restore the old duty on sugar at the next session. This is not surprising in view of the upward tendency of the government's expenses and the dwindling of revenues, even in face of the extraordinary taxes levied to sustain them.

Many democrats have been convinced from the beginning that it was a mistake to remove the duty on sugar, because it has been one of the most dependable sources of custom house revenues, and its elimination not only necessitated stamp taxes which are always unpopular, but free sugar means the death of an industry that has grown to considerable proportions in many sections of the country.

Another thing about the sugar duty is that it is one tax that is shared by the entire population of the country, whereas income taxes, excise taxes and other customs dues are usually paid by smaller groups of citizens.

The politicians, of course, are not agreed in matters of taxation. Some hold to the view that the rich should pay all taxes, whereas the theory of equal and exact justice would distribute the taxes among the people in proportion to their wealth. Moreover, it is to be doubted that the poor are wholly exempt from paying these special taxes collected from the rich.

Sugar's value as a source of revenue arises from the circumstance that it brings in a large sum at the customs houses, that the duty enables a large number of people to engage in the sugar-producing industry profitably and that it is the one commodity that is of universal consumption.

MERCENARY MOTIVE.

Evelyn Thaw, it is stated, will testify for the prosecution in the proceedings now in court instituted by Harry Thaw's attorneys to establish his sanity. The mere announcement is sufficient to convince the unbiased public of the mercenary motive that inspires continued resistance of the question of Thaw's sanity.

The immediate purpose of the prosecution in having Evelyn as a witness is to confuse the minds of the jury with testimony which, admitting it were relevant in the past, certainly is wholly irrelevant to the present state of his mind. The entire history of the Thaw prosecution may be summed up in the brief and incontestable conclusion that it is the most disgraceful known to American judicial proceedings.

Instead of fighting the Yaqui Indians, the Mexican government might do well to ask them to take entire charge of all Mexican affairs. They seem to be the only capable, energetic unit in Mexico's sadly mixed population. In their long history they have maintained themselves against all comers, and have shown themselves to be resourceful and industrious.

It is not clear why there should have been fewer marriages in June this year than in last, when it is absolutely certain that there has been no decrease this year in the June bride possibilities.

Both Shakespeare and Cervantes died on April 23, 1616, yet ten days actually intervened between the two deaths. The explanation is that then England was still using the Julian calendar.

Another difference between this and that is that home-grown sweet corn will soon be quoted on Front street at 20 cents a dozen, and on the retail markets at 30 and 40 cents a dozen.

If this country is having trouble about maintaining its neutrality, what about the experience of Switzerland, which is a small country entirely surrounded by war?

The opening of the Saturday half-holiday season is going to make extra work on the baseball diamonds and create a stronger market for splints and arnica.

Deep Wells.

Upper Silesia, in the German empire, has the deepest well in the world. It is a diamond drill hole in a coal field and measures 7,350 feet. A well in the United States that may go deeper, according to the United States geological survey, is four miles northwest of McDonald, Pa., and about fifteen miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone—a bed that elsewhere contains oil and gas—is now 7,174 feet deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6,830 and 7,100 feet rocks bearing rock salt and salt water were encountered. These are regarded as of saline age, the same as those carrying rock salt in western New York. The temperature in this well at the depth of 6,775 feet, as recently determined with great accuracy, is 145.8 degrees Fahrenheit.

At Derrick City, McKean county, Pennsylvania, near Bradford, there is a well 5,820 feet deep, which is probably the second deepest well in the United States. Another well is on Slaughter creek, Kanawha county, West Virginia; it is 5,595 feet deep. It penetrated a sandstone at 5,930 to 5,950 feet, and from this depth to the bottom, a distance of 545 feet, the well is in limestone. Near West Elizabeth, Pa., there is another well 5,575 feet beneath the surface, penetrating into a black shale. Another well being drilled at Gaines, Pa., has reached a depth of 5,500 feet. Deep well drillers in this country, of course, employ the most improved and effective rigs, but one of the most remarkable of wells, reaching a depth of 3,600 feet, was drilled for petroleum in western China by means of such crude appliances as cables made of twisted strands of rattan.

In 1914 the total value of all farm products in the United States was approximately \$19,999,999,999, which is \$83,000,000 more than the total for 1913, and breaks all records. The 1914 total is more than double the combined value of farm products fifteen years before. The streams of water used in hydraulic mining are sometimes said to be so swift that if one tried to hack into them with a sword the weapon would fly to pieces. The water is moving so rapidly that it has no time to yield beneath the stroke, and in consequence is like a bar of iron.

A German method for removing stumps is simple and less dangerous than our way. They bore a hole in the stump and pour into it equal parts of nitric and sulphuric acids. After a few weeks the largest stumps of hard wood are eaten by the acid and easily crumbled with a pick.

One seven-hundredth part of a grain of radium will thoroughly fertilize a ton of soil, and cause grain to grow with great rapidity. Where this experiment has been tried it has been noticed that all the leaves become very dark. Radishes and carrots raised in this soil grow to six times their usual weight.

Point Hope, Alaska, which is in darkness during the long arctic winter, will soon have an electric plant. Storms along the coast will be harnessed by windmills to produce the electricity.

A judge in Spokane has ruled that when twins arrive the doctor is entitled to a double fee. Roosevelt should be notified so as to thwart another conspiracy tending to race suicide.

You can't keep a kitchen cool in the summertime if you are going to have a dinner that is good enough to tempt the old man from getting his dinner at a restaurant.

Headline says: "Man burned to death in house outside of city." Now if it had read, "Man burned to death outside of house in city," it would have been really entertaining.

Fish are being shipped to England via Montreal from British Columbia waters, the reason being the fish shortage due to the war's interference with the North sea fisheries.

British Export Trade.

In January, this country's export trade in domestic products was less by 49 1/2 per cent. than in 1914; in February, the decrease was 36 1/2 per cent.; in March, 32 1/4 per cent., and in April, only 19 3/4 per cent. The April exports were \$2,000,000 greater than those of March. This shows the effort now being made toward maintenance of our export trade.

With manufacturing France crippled by an enemy invasion, and Russia's natural resources of wheat and other raw material still cut off to a large extent from their normal markets, London has to shoulder the burden of financing the imports, so necessary to speedy success in the war, of all the entente powers. Our gold stores have been and will still be, hope, be freely employed to assist this process.

But the main reliance must still be our merchandise exports, reduced as they are. The demands of the army and the war munition factories for more men are insistent, and will be supplied—whether on the existing basis or by compulsory service, is, for the present purpose, irrelevant. How to maintain our exports in face of withdrawal of skilled labor is the chief economic problem.

There is no single solution. But all over the country, manufacturers are waking up to their danger. They are trying to train the women and the men ineligible for military service to fill the inevitable gaps. The United States would have to face similar difficulties if American liberties were immediately menaced as ours are today.

Professor Becomes Student.

W. F. Gaskins, director of the School of Music at O. A. C., is spending his summer in Portland, where he will take vocal work under Franz X. Arens, a famous vocal teacher of New York City, who has opened a studio in Portland for a few weeks during the summer.

The port of New York in 1914 handled 46 per cent. of the entire export trade of the United States, and the total of \$1,807,000,000 of foreign trade, export and import, which passed through the port was larger than that of all the other American ports combined.

A cubic mile of river water weighs approximately 4,205,650,000 tons carries in solution, on the average, about 420,000 tons of foreign matter. In all, about 2,735,000,000 tons of solid substances are thus carried annually to the ocean.

An eight-day watch, which tells the day of the week and the month, is the product of a Belgian firm. The manufacturers claim that the time kept by the watch can not vary more than one minute in its eight-day run.

The state of Kansas has discovered that by introducing Bermuda grass it can exterminate dandelions. The grass is to be planted on the statehouse lawn, which at present is a solid mass of dandelions.

Coal is to be mined in Pennsylvania by steam shovels. The method is novel in coal fields, but has long been employed in the Minnesota "open pit" iron mining operations.

Pearls having an average total value of \$2,000,000 are exported annually from La Paz, a seaport on the gulf of California, near the southern end of Lower California.

Electrically speaking, the average man each day dissipates about 2 1/2 kilowatt hours of energy in motion, muscular action, mental exertion and heat radiation.

The Germans are entitled to no credit for introducing obnoxious and deadly gas bombs in warfare. The polecat beat Germany to the idea long ago.

United States policemen have formed a national organization.

FARMER'S HAULING SOLICITED

Notice.

The board of directors of union high school District No. 1, Multnomah county, Oregon, will receive up to 8:30 o'clock on Saturday evening, July 10, bids for the staining of the roof of the new high school building of said district. The directors ask for two separate bids to cover the work, done with either of two different materials—one bid for staining the roof with the best quality of Cresote Shingle stain (color to be selected by directors later), and one bid for staining the roof with Carbolanum, contractor to furnish materials. Directors reserve right to reject any or all bids. P. N. LASLEY, Clerk Union High School, Dist. No. 1, Multnomah Co., Oregon.

Bids Wanted.

Notice is hereby given that bids will be received for use of dance hall on fair grounds during the coming fair up to July 20th. Right to reject any or all bids reserved.

Address bids to H. A. Lewis, Portland, Oregon, R. 1. By order of Board of Directors Multnomah County Fair. D. M. ROBERTS, Secretary.

Bids Wanted.

Notice is hereby given that bids will be received for furnishing band music during fair (not less than 15 pieces.) Right is reserved to reject any or all bids, band to play from 10 a. m. to 6 p. m.

Address bids to H. A. Lewis, Portland, Oregon, R. 1.

By order of the Board of Directors, Multnomah County Fair. D. M. ROBERTS, Secretary.

Bids Wanted.

Wanted, 75 ricks first growth, live fir wood, to be delivered and placed in shed at Orient school prior to September 15, 1915. Address Chas. L. Hunter, clerk, Pleasant Home, Ore.

Japanese oysters are transplanted from their native waters to the dike-surrounded oyster beds of the Pacific coast, and flourish there.

Gresham Time Table

Trains for Estacada or Bull Run (Bull Run Trains leave Mt. Hood Depot)
12:25 AM Sun Only.
5:35 AM Dly. Mail and Express.
5:42 AM Dly. Ex. Sun. to Pleas. Home
6:52 AM Sat. & Sun. to Bull Run.
7:45 AM Dly. to Estacada.
8:45 AM Gresham, Sat. & Sun. to Est'da
