Her Rubbers.

She did not like to wear rubbers. She particularly despised them when it snowed, and she was compelled to feel a small sense of gratitude toward them. She despised them even more particularly when she stood on a corner waiting for a street car while electric and limousines rolled by on their comfortable, indifferent way. She despised them most particularly of all when she was struggling with an overfilled market basket in which the cabbage and turnips were everlastingly crowding on top of the celery and head lettuce. There was, certainly, no good reason why the rubbers were despised or all this combination of evils, but they were, and, to be quite fair, it should be explained that she was a more than ordinarily attractive young person, and that the rubbers were of a homely variety, with shapeless soles and spreading tops, and that they had swallowed up a pair of proud, high-arched, little boots.

Her street car did not come, and the basket grew heavier, and the cabbage more obstreperous, and the rubbers more objectionable. She stood close to the curb, and the electric and limousines passed so near that any one of them might have whisked her away if they had not all been so indifferent to attractive young women and to everything else except their respectable selves. After a while, however, one came along that did not seem so indifferent as the others. At least it did stop. It stopped directly in front of her while the policeman waved the traffic across the street ahead of it. The driver was very busy, watching his chance to get past the policeman. There was no one in the body of the car. And as it stood there waiting and softly puffing for breath, the door

swung open toward her. Without a thought of hesitation, or, indeed, a thought of any kind except that she would get rid of her rubbers, she stepped into the car, basket and all, left her rubbers with a little kick in the gutter and rolled away.

Now, of course, there was an opportunity for the easiest sort of romance. The driver might not have turned and looked into her eyes, and, disregarding the cabbage, have driven her swiftly away to goodness knows where. There was an equal opportunity for embarrassment. The car might have been an ordinary taxicab and the driver might have taken her home, and have charged her \$6.33. Almost anything might have happened, but nothing really did. That strange car went calmly on its way. The driver never did look around. And at last, when he stopped at a garage which was accidentally around the corner from her house, she climbed out of the machine and took the cabbage and turnips home, safely and respectfully, tremendously pleased that her rubbers were lying somewhere in the gutter.

The ampere, a unit of electrical measurement, is so named from Andre Marie Ampere, famous French scientist and philosopher, who spent much of his life in working over electricity, and who is known as "the father of electro-dynamics."

The Best Recommendation.

The strongest recommendation any article may receive is a favorable word from the user. It is the recommendations of those who have used it that makes Chamberlain's Cough Remedy so popular. Mrs. Amanda Gierhart, Waynesfield, Ohio, writes, "Chamberlain's Cough Remedy has been used in my family off and on for twenty years and it has never failed to cure a cough or cold." For sale by Gresham Drug Co.

LIBRARY NOTES

The February Ladies' Home Journal has an interesting article by a woman who fitted herself for a \$50 a week position by studying books from the public library. She asserts that her services were in demand because she knew how to use books. Every one can equip himself more thoroughly for his work by the use of books.

A new list of books for business men has been compiled and copies may be had at the library. This list includes books and magazines on advertising, banking, business law, corporations, credit, insurance, real estate and many other subjects. The technical department is exceptionally well equipped to serve business men. Books are sent from the central collection to the local branch every Wednesday.

TROUTDALE

A special meeting of Troutdale Chapter O. E. S., was held Saturday evening to receive the official visit of Mrs. Mary E. Houck, worthy grand matron of Oregon. She was accompanied by A. E. Pierce, worthy grand patron, Clyde Evans, past worthy grand patron and Mrs. Clara Graham of Portland.

Following the putting on of the work, solos were given by Mrs. Laura Harlow and Miss Sallie Fox. The evening ended with a big oyster supper. Good time was had by all present.

Aaron Fox has returned to Portland to the Good Samaritan hospital.

FAIRVIEW

Saturday will be grange day at Fairview, S. B. Hall, the new county agriculturist, will give a talk on that subject, detailing some of his plans for the coming year. There will be other good features on the program, which will begin at 1:30 and will be open to the public. All are invited.

The library at Fairview will be open on Wednesday afternoon as usual.

Boring School Notes.

Roll of honor for January—Leo Schwartz, Nettie Schwartz, Marguerite Palmer, Paul Gregson, Louise Maulding, Doris Dodd.

Myrtle Dodd and Carrie Gregson who have been ill the past week, are back in school.

Mattie Brooks, of Kelso, was a welcome visitor at our school, Monday.

City Market Problems.

City retail markets are a distinct advantage to both producer and consumer, where they are properly safeguarded and regulated. In our opinion says the Market Growers Journal they should be strictly retail markets and wholesaling should not be permitted. The housekeeper is often lost in the shuffle on a market where both wholesaling and retailing are followed. Again, none but producers should be permitted to sell on such a market and hucksters and peddlers should be barred. Of course, other regulations, that will readily suggest themselves, will be necessary. As we see it, there are two obstacles to be overcome before retail markets can be successfully operated. These are the habits of producer and consumer.

The housekeeper has been in the habit of using the telephone to give her daily orders to the grocer or the grocer sends a solicitor to get the order every morning. Prompt delivery of even a cake of yeast is demanded. Purchases are made in small quantities. All these things have added to the cost of food products, but the system has been convenient to the housewife and convenience has outweighed increased cost. Hence, the housekeeper must be educated to a new, yet old, way of purchasing her daily supplies. She must learn the advantage of buying on the open market in larger quantities and of making her own deliveries. It will be a cross for her to take basket on arm, board a car and visit the market.

Again, the producer has been in the habit of selling in large quantities and at wholesale to grocery and commission merchants. Education will be necessary to convince him of the advantage of selling on a retail market. The substitution of small measures for bushel baskets and barrels will prove annoying. The grower is a conservative. It is difficult to get him to change his ways of doing things. He must be "shown."

A final suggestion is that several markets, convenient to different resident sections, will be necessary in the larger cities.

An occasional coat of Lowe Bros. wagon paint will save your wagons and farm implements from rust and decay. It is inexpensive and will save you many dollars. Easily applied. We'll tell you how. Metzger Bros.—Adv.

Sulphuric Acid's Uses.

Sulphuric acid enters, somewhere or other, into the manufacture of many of the things we use or wear. The tub for the morning bath, if enameled, has been touched with sulphuric acid, and if an old-fashioned tub of tin, plated on sheet copper, even more sulphuric acid was used in its production. Water for the bath has, in all probability, been treated with sulphuric acid. The towel used after the bath has met sulphuric acid, and some of it possibly was employed in the preparation of the soap used. The bristles of the hairbrush used have been treated, and the back of the brush, if of celluloid, could not have been produced without it. The razor you may use was probably pickled in sulphuric acid after it was annealed.

Underwear is bleached with sulphuric acid before being woven, or possibly subjected to a sulphuric acid bath after being woven. Sulphuric acid, also, is necessary in the outer garments for scouring the wool and making the dye. It is likewise needed in button making, in tanning shoes and in producing shoe polish. At breakfast, the cups used, if decorated with gold, have seen sulphuric acid, which is used in dissolving the gold. The silver of which spoons and forks are made probably came from a sulphuric acid works which had first burned the ore. If plated, they were plated in a sulphuric acid bath. Rolls or bread eaten at breakfast have probably been made from flour produced by a farmer who used phosphate, which is sulphuric acid and phosphate rock, as fertilizer for his wheat land. If buckwheat cakes are eaten the syrup used on them probably has a little of the acid in it. Sulphuric acid is used in the production of an artificial light which an early breakfast hour may make necessary. It is needed in the refining of kerosene and gasoline, and is of prime importance in the manufacture of copper wires which carry an electrical current.

Sulphuric acid has been known commercially for about 100 years. The first step in its manufacture is the burning of sulphur. This forms a gas which is chemically treated to produce sulphuric acid. A curious feature of the acid is that it can not be shipped in diluted form in iron containers because it will eat through the iron, but strong sulphuric acid can be shipped in tank cars. The reason for this, according to a writer in Commerce and Finance, is that the iron salts produced by the action of the acid upon the metal are soluble in water but insoluble in strong sulphuric acid.

Labor and Capital.

The development of industry on a large scale brought the corporation into being, a natural outgrowth of which has been the further development of organized labor in its various forms writes John D. Rockefeller, Jr., in the Atlantic. The right of men to associate themselves together for their mutual advancement is incontestable; and under our modern conditions, the organization of labor is necessary just as is the organization of capital; both should make their contribution toward the creation of wealth and the promotion of human welfare. The labor union, among its other achievements, has undoubtedly forced public attention upon wrongs which employers of today would blush to practice. But employers as well as workers are more and more appreciating the human equation, and realizing that mutual respect and fairness produce larger and better results than suspicion and selfishness. We are all coming to see that there should be no stifling of labor by capital, or of capital by labor; and also that there should be no stifling of labor by labor, or of capital by capital.

Howl From Harvard.

Some strong wielder of the editorial thunderbolts of the Harvard Crimson, dazzled perhaps by that warm color, cries for "a few rabid, yet slight, unbalanced, red-flagged, extremist professors." Is Cambridge such a sealed paradise of sane professors that it finds wisdom monotonous and self-restraint and moderation a bore, and hankers for the voluble and shallow sensationalist? There are not many of the kind, but there are too many, and a weariness to the ear and eye. For the Crimson's "a few," substitute "fewer."

Shooting has become a popular sport in China, and the clay pigeon clubs have large memberships.

Severe Cold Quickly Cured.

"On December first I had a very severe cold or attack of the grip as it may be, and was nearly down sick in bed," writes O. J. Metcalf, Weatherby, Mo. "I bought two bottles of Chamberlain's Cough Remedy and it was only a few days until I was completely restored to health. I firmly believe that Chamberlain's Cough Remedy is one of the very best medicines and will know what to do when I have another cold." For sale by Gresham Drug Co.

Lots of Time.

A Northerner riding through the West Virginia mountains came up with a mountaineer leisurely driving a herd of pigs.

"Where are you driving the pigs to?" asked the rider.

"Out to pasture 'em a bit."

"What for?"

"To fatten 'em."

"Isn't it pretty slow work to fatten them on grass? Up where I come from we pen them up and feed them on corn. It saves a lot of time."

"Yaas, I 'spose so," drawled the mountaineer. "But, hell, what's time to a hawg?"

CHURCH SERVICES.

FREE METHODIST CHURCH—Morning sermon at 11 o'clock, evening sermon at 7:30. Sunday school at 10 a. m. Rev. D. M. Cathey, superintendent. Class meeting following morning. F. L. Ruge, class leader. Prayer meeting Thursday evenings at the church. Rev. Wm. R. Plumlee, Pastor.
