Speedy and Easy Riding

There's little comfort in most low priced cars. You can't use their speeds. They jostle you—they ride roughly—they don't hold the road.

The \$635 Overland is different. It is not only the speediest of low priced cars—

But you can use the full speed of its powerful motor when you need it.

It has long 42-inch, easy riding, shock absorbing cantilever rear springs. In addition the 75 B Overland is a longer car—104-inch wheelbase. And it has 4-inch tires.

Its smoothness and ease of riding at any speed would do justice to a much larger and heavier car.

Come in and let us demonstrate. That's the best kind of proof.

HURLBURT

It's an ill wind that blows no one any good." The auto truck comes and loads potatoes at our farms. If the roads were not frozen we would have to haul our spuds to the highway.

Roy Emily is able to be out again, after a spell of the grip.

Mrs. Jackson has been in Portland for a week, Miss Dorris Tucky is keeping house for Mr. Perkins during Mrs. Jackson's absence.

The cold wind is keeping those who have cabbage busy trying to save their crop. It also causes trouble on the telephone lines.

If you haven't had whooping cough don't come to this neck of the woods as every one who hasn't had it is having it or is due to have it. Jim Pounder is the latest case. Miss Burke, our school teacher is certainly having a whooping time.

Fred Shultz is sure going through this neighborhood quite frequently. Wonder where he goes?

Valve-in-Head Motor

Buick

The above is a likeness of the Buick Valve-in-Head touring car, Model D-6-45. It is the best motor car in the Buick Company ever made, and that it meets the approval of motorists everywhere is amply proven by the enormous demand for it.

This Buick Valve-in-Head model is light in weight, yet sturdy in construction. It has the power that can be had only with the famous Buick Valve-in-Head motor, now in the fourteenth season of successful operation.

In the Buick motor the valves are in the tops, or heads, of the cylinders, hence the name "Valve-in-Head." This means that the valves are in a spot that is already water-jacketed, so that the valves are in a spot that so that no additional water-jacketed space is necessary to cool them.

Make sure you understand this Buick Valve-in-Head principle. It is the greatest and most important principle in the whole field of motor car operation.

Completely Equipped MODEL D-4-35, \$785 At Gresham, Ore.

The Best Reason in the World why you should buy it is because it has a Buick Valve-in-Head motor. It is a Superior Car by virtue of its Buick Designing, Buick Integrity of Workmanship, Buick Valve-in-Head Power, Buick Provision for Comfort, Substantial Service and Gallant Conduct—at All Times—Under all Conditions.
