### MARRIED AT HILLSBORO AND KEPT THEIR SECRET

James Jennings, one of the well known young men of Gresham, has succeeded in "putting one over" on his numerous friends and acquaintances by getting married and keeping the secret for over five months. The following from the Hillsboro Argus, of October 5th, 1916, tells the whole story:

"James Jennings, of Gresham, and Miss Josephine L. Mitchell, of Portland, were married at the M. E. parsonage, today, October 5, 1916, Rev. R. E. Myers officiating. Mrs. Lucy Mitchell and Mrs. A. H. Shumate, mothers of the bride and groom, were present at the marriage. The young people will reside at Gresham."

Mr. Jennings is a carpenter of steady and industrious habits and is a member of the Gresham Volunteer fire department. He is building a house for himself and bride on South Roberts avenue, where they will live when it is ready. Since their marriage Mrs. Jennings has remained in Portland, and it has been noticed that Jim has been making frequent visits there, sometimes remaining for several days at a time. A rousing reception is awaiting him and his wife when they come here to take up their permanent residence.

## BE THRIFTY

You don't attempt to weave the cloth in your garments; you do not even make the garments after the cloth is woven.

You do not shoe your horse nor make the harness he carries on his back. You do not make the many articles in daily use about the house which it might be possible for you to make.

### WHY?

Because it is not economy to do so. It does not show thrift. You do hire a seamstress to make you a beautiful suit. You hire a Notary Public to carefully prepare you a deed or mortgage; you employ an attorney to examine the title to land which you expect to purchase.

### WHY?

Because it is economy to do so. It shows thrift. You can not compete with the wholesalers of these commodities. We have the tax roll and will pay your taxes if instructed to do so. We can do so better than yourself. We are in the business and can guard against mistakes which must occur even in the payment of taxes. Write or telephone us concerning the payment of your taxes. We will give it our best attention.

## A Product of Experience

Intensity of purpose has characterized the building and the development of the Chevrolet. And that purpose has been to build the best car in the world for the money. This we believe we have accomplished, for the Chevrolet has found a place in all the inhabited countries of the world. World-wide popularity does not come by chance. World-wide laurels are not won without merit. The reasons for this leadership are many. But the principal one is that the Chevrolet meets every requirement of the motorist. It fulfills each mechanical duty satisfactorily and consistently, and in addition has all the other qualities that contribute to comfort and convenience.

The Chevrolet is an equally balanced car—balanced as to looks and mechanical dependability. They are equally important. And you are not satisfied if either one is missing.

"FOUR-NINETY" TOURING CAR, \$625.00 F. O. B. PORTLAND

The Chevrolet Four Ninety Touring Car is a car of ideal economy. It gives you the most value for your money.

The Chevrolet delivers the maximum power to the rear wheels. It accomplishes this feat through simplicity of mechanism. This compels directness of action. The result is more power and speed, and less fuel and expense.

The path of Chevrolet power is short and direct. The vaporized fuel enters directly into the valve-in-head motor. The impact of explosion strikes full against the piston head. It is an act of face-to-face cooperation.

The fullness of the force is exerted immediately on the rear wheels. No fraction of a second or horse-power is unduly spent. The unit power plant type of construction does the business.

And the result is, of course, that you ride faster and farther on one gallon of gasoline in this particular model.

That is economy. And that is what you will find in the Chevrolet Four Ninety.
