It is pleasant to take, too, which is of great importance when a medicine must be given to young children. This remedy is most effective in relieving coughs, colds and croup. Obtainable everywhere.—Adv.

**Smith Form-a-Truck**

**\$350**  
c. o. b. Chicago

Horse-drawn delivery and hauling saddles you with an excess cost for equipment that can easily amount to 75% over your entire investment.

**A Money Saver**

Smith Form-a-Truck eliminates all unnecessary investment in delivery and hauling equipment. It easily hauls twice the tonnage hauled by horses over three times the area and in the same time. This is real hauling and delivery efficiency—time saving, money earning in every line of business.

**Loaders' & Drivers' Wages**

Where you now use from three to four horse-drawn teams, one Smith Form-a-Truck will easily do the work. Loaders' and drivers' wages are saved. The men on the loading platform work steadily and earn money for you instead of wasting it waiting for slow moving teams to get back.

**Horses Must Rest**

Your excessively large, horse-drawn equipment costs you money for upkeep on working and non-working days. Stabling, feed, veterinary bills go on all the time—and for steady service all day you must have extra equipment to give the horses a rest.

**Expense Stops**

Smith Form-a-Truck costs nothing to maintain when it is not working. Stop the motor and the expense stops until you start it up again. There is no non-production expense. And the actual cost

of maintenance when Smith Form-a-Truck is running is not only far less than for horses, but less than for any other form of hauling or delivery.

**A Big Guarantee**

And you can put Smith Form-a-Truck at work in a few hours. Simply attach it to any Ford, Maxwell, Buick, Chevrolet, Dodge Bros., or Overland power plant. The truck construction is permanent—fully guaranteed—the mechanical equal of the highest priced truck you can buy.

**Rear Axle Carries Load**

You know the service value, the economy standard of the famous power plants with which Smith Form-a-Truck can be used. And the power plant only pulls the load. The Smith Form-a-Truck carries it—90% of the entire load rests on the sturdy Smith Form-a-Truck rear axle.
