TERMS—Six months' time on all sums over \$25 with approved security at 6 per cent. 2 per cent discount for Cash.

A. W. SCOTT
OWNER
COL. W. S. WOOD, Auctioner, Vancouver

A method by which metals which have been absorbed by a human body can be withdrawn by electrolysis has been developed by an Englishman.

Insomnia.
Indigestion nearly always disturbs sleep more or less, and is often the cause of insomnia. Eat a light supper with little if any meat, and no milk; also take one of Chamberlain's Tablets immediately after supper, and see if you do not rest much better. Obtainable everywhere.—Adv.

CLEAR LAND
WITH
DU PONT Red Cross Explosives

The upper view shows how groups of big stumps are blasted out clean at one time, with all dirt of the roots and stumps shattered into kindling wood. At the same time the subsoil is thoroughly broken up, creating a fine home for the new crop. Lower view shows a celery crop worth \$800 per acre ten months after stumps were blasted out.

To learn how progressive farmers are using dynamite for removing stumps and boulders, planting and cultivating fruit trees, regenerating barren soil, ditching, draining, excavating, and road-making.

PLEASANT HOME

A miscellaneous shower was given on Mrs. H. F. Whilon last week at the home of her sister-in-law, Mrs. Bretcher, in Portland.

Mrs. D. M. McLaughlin made a visit on her farm near Pleasant Home Thursday.

There will be a patriotic meeting in the near future at Pleasant Home.

Miss G. Iekler is sewing for her cousin, Mrs. A. Witter, at Gresham.

Mr. Weatherwax is clearing a few acres of land which improves his farm very much.

The Sunshine club will meet with Mildred Forde Saturday, April 28.

Dr. H. H. Ott, of Gresham, took supper with Mr. and Mrs. H. F. Whilon Thursday evening, it being Mr. Whilon's birthday.

J. B. Kelly, of San Francisco, was in this community on business last week and called on old friends. Mr. Kelly has a four-acre tract near Portland, which he is planning to improve.

Ten women of the Baptist Aid society went to Gresham yesterday, where they were entertained at the home of Mrs. Arnold Ruegg.

Mrs. M. Shumway and Mrs. Martin Lennartz made a business trip to Sandy yesterday.

E. A. Niblin has men at work on the 10-acre tract belonging to Miss Ruth Niblin, which is a part of the old Calvin estate. Considerable clearing and improving is being done and it is rumored that a fine residence will be built here in the future.

VENTURA PARK.

The community meeting of the Base Line Improvement club held Wednesday evening, April 18, was well attended. Judge Stevenson of Portland was one of the speakers. He told what he thought these community meetings meant to the rural districts. He said he was glad to see different clubs formed to boost their parts of the country and make it attractive. He also spoke on the food situation and hoped everyone would do their part in seeing that all vacant property was used this year. John Welbes, Jr., master of the Russellville grange spoke on "Co-operation."

He said the rural districts had lacked co-operation in the past and this was the cause of the conditions existing at the time. He said he had observed that the members of the Base Line Improvement club were not old residents here, but people that have moved here in the last five or six years and he commended them for the work they had accomplished in the short time they had lived here. Others who spoke were, Mr. Umbdenstock of Portland, Peter Schultz and Mrs. Jelkin, president of the Rockwood Improvement club.

LUSTED

Born to Mr. and Mrs. E. E. Quay April 18, a daughter.

Mr. and Mrs. Irving Neibauer and E. N. Hamilton took a trip up the highway last Sunday, going almost to Bonneville.

Mrs. Ed. Sester has been quite ill with tonsillitis, but is improving.

Walter Patison, of Portland, visited his cousins, Mr. and Mrs. A. Jackson, several days this week.

Knitting in church is suggested by the Rev. A. M. Mitchell, a Church of England clergyman, in his parish magazine. "Better to knit for our soldiers and sailors in sermon time," he says, "than to talk and whisper, laugh and gibe, flirt and misbehave, criticize hats, gowns and fur coats. Those constantly knitting learn to do so quite mechanically and their attention is not diverted from speech. Knitting in sermon time would mean a great saving of time."

The raising of cattle in Rhodesia has now reached the stage where an outlet must be found for the excess of meat products. The Cape Times, of Cape Town, says that a former mayor of Salisbury, Rhodesia, is now in the United States, where he has engaged the services of an expert adviser for a packing plant.

COTTRELL

Miss Rosa Beers and Fred Wagner were married at the courthouse in Portland at 4 p. m. Tuesday. Mr. and Mrs. Wagner returned to Cottrell Wednesday, where they expect to reside.

Mrs. R. A. Hutchens will entertain the Ladies' Embroidery club Wednesday afternoon, May 2.

Rev. Alexander Beers will preach at the Cottrell community church at 3 p. m. Sunday, May 6.

The many friends of Miss Rosa Beers gave her a shower at the home of her parents last Monday afternoon.

Wm. Craswell and son Lawrence motored to Portland on business Wednesday.

Mrs. Randolph Spiers, who has been ill at the Good Samaritan hospital for the past three weeks, returned to her home Sunday.

Born to Mr. and Mrs. Jim Fowler, Wednesday, April 25, a girl.

Industrial Research.

A large electric company that spends hundreds of thousands of dollars annually on its industrial research laboratory advertises that fact widely. Indeed, says Raymond F. Bacon, director of the Mellon Institute of Industrial Research, University of Pittsburgh, one is impressed, on studying the matter, by the truth that a large number of companies are beginning in a nation-wide way to advertise that they are continually conducting well directed research to improve their products. He recently had occasion to inquire of most of the American industrial concerns which conduct research, regarding the growth of their laboratories. Though he was aware of the growing appreciation of the value of research as applied to manufacturing, he was astonished to find that increases of from 100 to 500 per cent in the research activities of these corporations were exceedingly frequent. There is only one conclusion to be drawn from this, he says, in the Scientific American, and that is that research pays—pays in a dollar and cents way.

Yet he feels that in this country we are only at the beginning of a real appreciation of what properly conducted research can do for industry. The possibilities are almost limitless, for new discoveries constantly open new fields. In illustration he cites some instances from the domain of iron and steel. "Tremendous advances," he says, "have been made in imparting new properties to these old metals by means of mere traces of other metals. For example, it has been found that a mere trace of copper gives to steel the desirable property of resisting corrosion, while the addition of small amounts of vanadium or tungsten to steel affords a supersteel with certain physical properties far beyond those of any ordinary steel. We see the addition of magnesium giving to aluminum new properties of strength and casting quality which immediately make this metal available in a large way for use in automobiles, aeroplanes, etc. Such matters as these, where a metal has conferred upon it entirely novel properties and thereby enters into an immense new field of usefulness by the addition of very small amounts of some other metal of metals, belong in the field of those things that can not be predicted by existing scientific theories. The only way such discoveries can be made is by patient and careful application of cut-and-try, and when one considers that the number of possible combinations runs into hundreds of thousands, it will be seen how much work is open in this field of 'dilute alloys.'"

"The day is past," he also says, "when great discoveries and noteworthy improvements in any particular line of manufacture are made by some one man or even by some organization. Usually many organizations are simultaneously engaged in the investigation of some general problem and the results obtained by all are gradually fused into an advance of technical importance."

PLEASANT VALLEY

Mrs. W. U. Moore spent the week end in Portland visiting with friends.

I. F. Coffman, of Lents, was out on Monday looking after his ranch.

J. H. Nolta, of Portland, was looking after business affairs in the valley Tuesday.

C. M. Harrison, of Gresham, was a valley visitor Tuesday.

A. Stayner, city milk inspector, was a visitor in this vicinity Tuesday.

Romeo Regette, of Kern Park, was in our midst on business Wednesday.

Mrs. W. U. Moore entertained the Ladies' Aid at her home Wednesday afternoon.

Pleasant Valley grange meets in regular session Saturday, April 28.

Smelt fishing in the Sandy river was the popular pastime with many of our neighbors this week.

Styles in Money.

Had you heard any complaint about our money being old-fashioned? Somehow, folk have seemed to bear up under its lack of style, just so they had plenty of it. But, of course, if square money is the latest thing, we want to keep up with it, and we'd like to be the first by whom the new is tried, as well as the last to lay the old aside. Just any way, so we don't lose out while the change is being made.

Some very convincing articles are being written, pointing out all of the advantages of the new style. Probably the point that will impress people most is that square money will not be easily lost. It seems that the roundness of our present coin accounts for much of it getting away. The woman who hasn't a firm grip on her small share of the filthy lucre read this statement with much interest. It will be information which she can use when it comes to the last of the year again, and time for balancing the book. When, as usual, it comes to light that she's had money, more or less, and that it is all gone, she can say boldly to the head of the house when he looks over his spectacles, with the quizzical grin: "It's all the fault of the old-fashioned round money. Being round, it rolls to places where you can't find it, and they say that thousands of dollars go that way every year. When we get square money I'll—" She won't get much further than that, because she hates making promises, and, besides, she has a secret fear that even square money will slip through her fingers and go bumping off on its corners.

But there is one real advantage to be set forth. Women can string their money, that is, if the square coins are to have a hole in the center, and they can go down street dangling the string. Women love things like that evidently for they're even putting danglers on their spring hats, and they will carry nearly any

Wedding Bells for You?

A man of the world—one who knows his said:—"No young man who values his self-respect will dare to contemplate matrimony until he has saved at least \$500!"

Better Be Safe Than Sorry

It's easy enough to get the five hundred! Let us tell you about it. Any bank can TELL you how to get the stipulated price; our bank will help you do it! 500 silver dollars have a music all their own; wedding bells and round silver dollars are a happy melody!

WE CAN TELL YOU HOW TO MAKE DOLLARS GROW FROM DIMES!

BANK OF GRESHAM

kind of ridiculous bag, if it has a tassel or dangle of some sort on it. To be sure, they'd want as long a string as any other shopper, and some might want any number of strings, ornamenting the arm from the wrist to the elbow, like the old-time bracelet fad. But it's all right to let them try it awhile, just for diversion.

Some of the designers state that the square coin will adapt itself to more artistic decoration, but so far as that goes the old style has been artistic enough for most of us. Really, the chief argument in favor of the new shape is that one about it not getting away easily. If this is really true, let's get out a petition to have square cut money along with other spring styles.

Veldt is a changed form of the Dutch "veld," the same as our English word field. It means simply open ground, or prairie. Westervelt means west field; Roosevelt, rose field; Plauvelt, blue field. There are other Dutch names ending in "velt," and many parallel names in German and other tongues.

Safe Medicine for Children.

"Is it safe?" is the first question to be considered when buying cough medicine for children. Chamberlain's Cough Remedy has long been a favorite with mothers of young children as it contains no opium or other narcotic, and may be given to a child as confidently as to an adult. It is pleasant to take, too, which is of great importance when a medicine must be given to young children. This remedy is most effectual in relieving coughs, colds and croup. Obtainable everywhere.—Adv.

Mountain Meadow Butter

Manufactured by
SANDY CREAMERY COMPANY

The name "Mount Hood Butter" has heretofore been used by permission of the Mount Hood Ice Cream Co., which has all its dairy products registered under that title. That permission has ceased, hence the change of name, which became effective on January 1.

"Mountain Meadow Butter" will be found at all the leading stores in the county. Ask for it.
