pledge our faith. We pledge our all."

"Governor Kaius has telegraphed the First State Bank at Gresham to accept subscriptions until such time as they can no longer reach the Federal Reserve Bank at San Francisco by telegraph by noon June 15. A portion of the telegram reads as follows:

"You are earnestly urged to redouble your efforts to increase subscriptions to utmost limit during the few remaining days as only by such increased effort can proportion of this district be realized. Up to present time the Twelfth Federal Reserve district has not lived up to its reputation or met what in a true sense is its obligation. We must not fail."

"The First State Bank has been allotted and is expected to obtain subscriptions to an amount to ten per cent of its individual deposits of \$14,000. Up to the present time there has been less than \$8,000 subscribed. It urges upon all of its customers to take all of these bonds that they can possibly pay for out of earnings of next six months. Remember it is necessary to pay two per cent only at time of subscription and the balance in installments.

"If you have an account at the First State Bank do not fail to telephone them to take one or two dollars from your account and reserve for you a \$50.00 or \$100.00 bond. Be a soldier even though you can not fight in the trenches. Do it now."

"You must not wait. Show to the United States government that Gresham is on the map. The \$14,000 must be subscribed and you can assist. You will not regret it and we will appreciate it."

CLARION CALL IS SENT

Continued from page 1
the available power has been spoken for at a figure sufficient to pay operating expenses, interest and renewals, leaving the other half to be used by the people of the town for domestic purposes.

Several capitalists have expressed a willingness to finance the project. The rights are perpetual if the power is developed, and if not developed, the filing may be protected for the city by a similar filing fee every five years of eight dollars.

The law which gives cities the right to make such reservations of available power sites means that Gresham may now own its own plant, and that it may take advantage of the privilege of the law granting such rights to supply its people with light and power in preference to individual or corporate rights.

Estimates of the cost of building a power plant of sufficient capacity for the purposes indicated are not available. Perhaps they have not been completed, but enough is known to justify the belief that if the offer to finance the project is accepted that the people of this city will be able to make a material reduction in the cost of all power and lights now in use, and that the cost will grow less as the city increases in population.

Bowel Complaints in India.

In a lecture at one of the Des Moines, Iowa, churches a missionary from India told of going into the interior of India, where he was taken sick, that he had a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy with him and believed that it saved his life. This remedy is used successfully in India both as a preventive and cure for cholera. You may know from this that it can be depended upon for the milder forms of bowel complaint that occur in this country. Obtainable everywhere.
