## WHY DAIRY COWS GO TO BUTCHER

Prof. Fred Rasmussen of Pennsylvania State college says:

"Dairy cows are being sold for several reasons.

- 1 The price of milk has not increased with the rapid increase in price of feed, labor and cattle. These three items represent 80 per cent to 85 per cent of the total cost of producing milk.

- 2 The prices of beef, mutton, poultry and eggs, have responded much more rapidly to the increased cost of feed and labor. Meat is very high and therefore the dairy farmers under the present high prices of feed and scarcity of labor find it advantageous to sell their dairy cows.

- 3 In sections where cows are supported on land adapted for staple crops, such as wheat, corn, barley and potatoes, all of which are much needed at the present time, the dairy cow is rapidly disappearing. The crops offer an opportunity in such localities to change from an unprofitable dairying to a profitable system of farming.

- 4 Added to these outside economic influences upon the dairy business there is further reason, for the increase in price of market milk, viz.: The great demand for milk to be made into butter, cheese, and condensed milk. The price of these products has increased much more rapidly than the price of market milk because of their great food value and of their adaptability for use by the armies of the world.

"No manufactured article will, for any length of time, be sold below the cost of production. Like any other article of commerce, the price of milk must fluctuate with the cost of raw material and labor. No one questions the desirability of keeping milk at a price within the reach of the working classes, nor is the motive of those who are making strenuous effort to prevent a rise in the price of milk questioned.

"Yet it would be most unfortunate, both for the industry and the peo- at large, if by artificial means a legitimate increase in the price of milk should be prevented. Such a condition would mean more cows to the butcher, an increased shortage of milk and still higher prices for milk. It would be a sure way of taking the milk away from thousands of poor children during the coming winter."
