With the sight of millions of men marching to death for convictions dear to them, it will be no longer possible for us to insist upon artificial or trifling tests as signs of the Christian spirit. It is the function of the Church today to make men conscious of the spirit which possesses them, to bring out in the clear light the Christ who is working within them."—Bishop Francis J. McConnell.

## PROBLEMS TACKLED. O. A. C. PRUNING SCHOOL

Does it ever pay to dehorn a tree? If an orchardist can get control of wood growth fruitage without the expense of growing and removing large quantities of surplus wood, why should he not do so? Stockmen have found that by removing the spur they never have to remove big horns. Can orchardists control their tree growth in like manner? If so, how?

What becomes of spurs on a Spitzenburg tree after they are three years old? Can you revitalize old spurs?

Other questions to be answered at the school are the following: When do fruit buds form? Can you tell fruit bud in winter time? How can you increase size of fruit by pruning? Why are some trees annual bearers? Can you prevent by pruning much heading of branches when heavily loaded? If a tree is becoming one-sided can you correct it?

The questions of rise, spread and control of insect and disease pests will also be answered. Some of the most recent and necessary information on the principles of growth and nutrition will be given out in lecture form for the first time.

Afternoons will be devoted entirely to field work in pruning expert direction. The school will be held just before winter pruning is taken up, giving fruit men an opportunity to attend and then immediately put into practice the things they learn in the year's pruning.

## WHICH SHALL IT BE?

Lord Northcliffe, chairman of the British War mission to the United States, places the food situation before the American people in the following terse statement:

"The greatest food experts on both sides of the Atlantic say that there is a world shortage of food. The boys who are enduring the hell of the trenches for our sake cannot hold out if ill fed. The situation which we have to face right now is plain. Either the stay-at-homes must save so that the soldiers may get their vital needs, or the soldiers must go short so that the stay-at-homes may fatten. You cannot have it both ways, and must make your choice.

If you can't raise a pig, save one. You can do so by eating less pork.
