"What we demand in this war, therefore, is nothing peculiar to ourselves. It is that the world be made fit and safe to live in; and particularly that it be made safe for every peace-loving nation which, like our own, wishes to live its own life, determine its own institutions, be assured of justice and fair dealing by other peoples of the world as against force and selfish aggression. All the peoples of the world are in effect partners in this interest, and for our own part we see very clearly that unless justice be done to others it will not be done to us. The program of world's peace therefore, is our program."—President Wilson's Message of January 8.

**About Constipation.**

Certain articles of diet tend to check movements of the bowels. The most common of these are cheese, tea and boiled milk. On the other hand raw fruits, especially apples and bananas, also graham bread and whole wheat bread promote a movement of the bowels. When the bowels are badly constipated, however, the sure way is to take one or two of Chamberlain's Tablets immediately after supper.—Adv.

**The Schools and the Treasury.**

The tremendous effective national service that the school and school children of the country can render is being availed of as fully as possible by the Treasury Department in its work. In a great number of schools liberty loan clubs have been organized, and many bonds also have been purchased by individual pupils. The War-Savings campaign is endeavoring to have a War-Savings club established in every school in the country, and organized and individual effort is to be stimulated in every way.

Secretary McAdoo has said that he would like to see every schoolhouse in the United States an open forum, where patriotism and loyalty are taught, and a center of national service in its community and among its pupils and patrons. The school as a medium to reach the people of the rural districts is of especial value.
