The Linotype Way is the Way that Wins.

Official paper of the Town of Gresham Official paper of the Town of Fairview.

Entered as second-class matter March 3, 1911, at the Postoffice at Gresham, Oregon, under the Act of March 3, 1879.

DON'T GET EXCITED

Continued glad news from the Italian and western fronts is supplemented by persistent reports, superficially no less calculated to rejoice the hearts of Americans and their allies, of signs of revolt in the interior of both Austria and Germany.

In the very general press tribute to the patriotic efficiency of American women in the present world crises, the value of Women's club organization, in war as well as peace, has come in for prominent mention.

No longer can the humorist cast aspersions on the club woman on the charge of neglecting her home and family for social activities, bridge parties and gay sessions in her clubs.

The state federation of women's clubs has been fortunate in having the assistance in many instances of some of the most brilliant women of the country, who have come from the east, where the privileges of advanced art, literature and social life are enjoyed.

Organizations of women, if planned along right lines and conducted with a view to improving the conditions of members as well as civic and national conditions, are invariably beneficial to their communities and deserve encouragement of a substantial nature.

A year ago there was a spirited controversy in the United States over the question whether or not we should have "business as usual."

This was a wholesome view of the case. Acting upon it, we stopped wrangling, and steadily brought agriculture, mining, manufacturing, transportation, commerce and private life more and more into line with the requirements of the war.

On the other hand there remains a good deal to be done in the way of concentrating ourselves on the only business that is worth while, and, after allowing a year for voluntary readjustment, the president has appealed to us to expedite the transformation of our ways of life with a view to increasing production of war necessities.

tion created by the war, and shape their lives according to it. It was as plain as daylight a year ago that millions of men could not be taken from customary occupations without labor readjustment, that industry could not be turned over to the making of munitions without curtailment of non-essentials, that the money necessary to the business and the charities of the war could not be raised unless some of it were withdrawn from the customary channels of circulation.

THE SAME EVERYWHERE

In the very general press tribute to the patriotic efficiency of American women in the present world crises, the value of Women's club organization, in war as well as peace, has come in for prominent mention.

No longer can the humorist cast aspersions on the club woman on the charge of neglecting her home and family for social activities, bridge parties and gay sessions in her clubs.

The state federation of women's clubs has been fortunate in having the assistance in many instances of some of the most brilliant women of the country, who have come from the east, where the privileges of advanced art, literature and social life are enjoyed.

Organizations of women, if planned along right lines and conducted with a view to improving the conditions of members as well as civic and national conditions, are invariably beneficial to their communities and deserve encouragement of a substantial nature.

A year ago there was a spirited controversy in the United States over the question whether or not we should have "business as usual."

This was a wholesome view of the case. Acting upon it, we stopped wrangling, and steadily brought agriculture, mining, manufacturing, transportation, commerce and private life more and more into line with the requirements of the war.

On the other hand there remains a good deal to be done in the way of concentrating ourselves on the only business that is worth while, and, after allowing a year for voluntary readjustment, the president has appealed to us to expedite the transformation of our ways of life with a view to increasing production of war necessities.

On the other hand there remains a good deal to be done in the way of concentrating ourselves on the only business that is worth while, and, after allowing a year for voluntary readjustment, the president has appealed to us to expedite the transformation of our ways of life with a view to increasing production of war necessities.

On the other hand there remains a good deal to be done in the way of concentrating ourselves on the only business that is worth while, and, after allowing a year for voluntary readjustment, the president has appealed to us to expedite the transformation of our ways of life with a view to increasing production of war necessities.

tion created by the war, and shape their lives according to it. It was as plain as daylight a year ago that millions of men could not be taken from customary occupations without labor readjustment, that industry could not be turned over to the making of munitions without curtailment of non-essentials, that the money necessary to the business and the charities of the war could not be raised unless some of it were withdrawn from the customary channels of circulation.

Of course it would be pleasant to jog along through the war and consider it as a rather expensive "extra." But we can't do that. We are not to ride through to Berlin in a parlor car.

We might as well respond cheerfully. The quicker we make the voluntary accommodations to war's demands the more speedily we shall get our war stride, the more fully we do the necessary thing, the further off we put the day when the president will supplement his appeal with the exercise of his large powers over the means by which the war is to be fought and won.

There is a movement on foot to get the paper mill strikes settled at Camas and Oregon City. The workers will most likely get an increase of 10 per cent in their wages. We may blame it all on the Kaiser or the shortage of wood pulp or the fact that the man in the moon continues to make faces at us.

Uncle Sam has not merely commandeered the use of the Hamburg-American and North German Lloyd docks in New York, but has taken them permanently. By the time we wind up this little affair with Germany the Kaiser will have an inkling of what he really did to Germany when he affronted the United States.

This is the season when the malaria-carrying mosquito lays low in the weed patch by day to initiate a malarial bombing expedition by night. To cut weeds is a war work of importance. Cooperate with the United States public health service of your home town. Help make good health contagious in every community in Oregon.

It is all right for the small boy to be ambitious to become president or the owner of a bank, but we can tell him however attractive life may become during its golden years, it will never be quite as full of joy as it is during the youthful summer nights when he can sleep with his dog.

Oh, yes, even in hot weather there are a few Oregon people who become so thoroughly devoted one to another that the only thing to do is to hike out for Vancouver and wake up the knotty functionary who is dozing in a hammock under a shade tree.

We might be able to sidetrack a lot of trouble by thinking twice before speaking, but the only way to be sure is to think three times and then take a long nap before releasing the safety and starting the tongue full speed ahead.

Kipling wrote of the United States Marines: "For there isn't a job on the top of the earth the beggar don't know or do." But we knew it long before Kipling did and are considerably glad that he agrees with us.

The new war revenue bill will levy taxes at the rate of \$80 per capita. Wonder who is going to pay the balance of ours after we have pungled our proportion according to our wealth.

The Kaiser has so many things to think about that it wouldn't tax his mental machinery to remember that we are going to have another million men in France by Thanksgiving Day.

Charlie Schwab was in Portland the other day and as a result we are going at it harder than ever in making preparations for our visit to Berlin.

One reason why "Sammy" is objectionable as a name for our soldiers is, the war poets can't find anything to rhyme with it.

It used to be "All's quiet along the Potomac." Now it's something doing every minute—and everybody seems to be doing it.

Lest we give the sons of Berlin something over which to gloat, think of German propaganda, then go get the Kaiser's goat.

The man who can get fried chicken cheaper than beef is buying his fried chicken from a chicken thief. P. S. He's lucky.

BETTER SHIP LOADING HELP OUR ALLIES

Economies of approximately 20 per cent in shipping weight and 50 per cent in shipping space have resulted from improved methods of packing merchandise for overseas practiced by the Army Quartermaster Corps.

For the shipping of clothing and equipment, including such items as blankets, barrack bags, towels, shelter tent halves, bedding, and other dry goods, in addition to wearing apparel, baling has been substituted for boxing, and the weight of the lumber has been saved. The bales average 30 by 15 by 15 inches and weigh 90 pounds.

Women are stevedores on the docks in France. There is a law they shall not be required to carry packages weighing more than 70 pounds. Packages shipped to the American Expeditionary Forces are standardized so they shall not weigh more than 70 pounds for handling by one woman carrier or more than 140 pounds by two women carriers.

The Quartermaster Corps recommends to manufacturers supplying the Army many similar economies in packing and shipping which will result in even more pronounced space and weight saving. Round cans and containers entail a waste in space of 23 per cent. Square containers are urged. It is estimated that every inch saved through bale compression is worth 65 cents in ship space.

LOAN INSTALLMENT TO BE 35 PER CENT

An item in the last Outlook stated that the next liberty loan installment would be 18 per cent payable on July 18. It was slightly wrong, as the payment due next Thursday is 35 per cent. In this connection it may be interesting to know some of the facts that are being made public in connection with the fourth liberty loan which is scheduled for the first of October.

Bonds of the Fourth Liberty Loan are now being turned out by the thousands daily by the Treasury's Bureau of Engraving and Printing. The bonds are similar in form and design to those of the third loan, and space has been left on each bond for inscription of the exact terms of the bonds.

It is believed that a sufficient number of the bonds will be ready to make possible immediate delivery of all bonds of the fourth loan as they are purchased.

The report that only banking institutions qualified as United States Government depositories would be allowed to take subscriptions for the fourth liberty loan has been emphatically denied.

"The Treasury Department," says Secretary McAdoo, "desires that all banking institutions shall continue in the future as they have in the past patriotically to assist and co-operate during the various campaigns for the sale of Government securities."

Secretary McAdoo's often expressed gratitude and appreciation of the patriotism and the wonderful effectiveness of the work of the banks of the country in the past liberty loan campaigns would seem absolutely to negative any idea that he would refuse to avail himself of their assistance in future campaigns.

Follows Husband.

Mrs. Gordon Southam, of Hamilton, Ontario, whose husband was killed in action and whose brother also made the supreme sacrifice, is going to France as a Y. M. C. A. canteen worker. "I'd fight if I could," she said, "but I want to do what I can to help the fighting men."

If we are to believe all rumors the former czar dies a couple of deaths a week in addition to being assassinated once in a while.

As a senatorial candidate Henry Ford is not a self-starter. It took the president of the United States to get him going.

For men and women—cleaning, pressing and repairing done well. Peter Lenard, Powell street.

Are You One of Them?

There are a great many people who would be very much benefited by taking Chamberlain's Tablets for a weak or disordered stomach. Are you one of them? Mrs. M. R. Searl, Baldwinville, N. Y., relates her experience in the use of these tablets: "I had a bad spell with my stomach about six months ago, and was troubled for two or three weeks with gas and severe pains in the pit of my stomach. Our druggist advised me to take Chamberlain's Tablets. I took a bottle home and the first dose relieved me wonderfully, and I kept on taking them until I was cured."

HIS NARROW ESCAPE SOMEWHERE IN FRANCE

While on his way recently to a Y. M. C. A. hut in France where he was booked for a lecture, C. Grant Robertson, an Oxford professor, saw two houses struck by a shell. Both houses collapsed. Professor Grant's motor car stopped several yards from the shattered building, and a moment afterward another shell struck the ground at about the spot which the car would have reached if it had proceeded. In a jiffy the car was off in a detour of the crater thus made, and the next instant a third shell dropped at the point which the car had just left.

Weather Forecast.

Forecast for the period July 15 to July 20, 1918, inclusive. Pacific Coast States: fair with normal temperatures.
