A Marine's Viewpoint.

The success with which the U. S. Marines are facing the enemy in France is shown in a letter from Lieutenant Lee, a New Yorker, which reached his family a few days ago. The department of the "soldiers of the sea" astonished their comrades in arms from other countries. Lieutenant Lee said the Huns had, up to the time of writing, surrendered in fair numbers after learning of the thoroughness with which the Marines polished off their opponents. The enemy call the Marines "teufel Hunden" and they have a deadly fear of the men in the olive green uniforms.

"I have certainly seen some fighting," the Lieutenant wrote. "It's something you can't forget. After you are in a fight you never think of danger and furthermore, there is something fascinating about it all. We have a fine body of men and, believe me, when we start we'll bring home the bacon." The confidence expressed by this member of the Marines is shared as well by Uncle Sam's men generally.

It Is Just What Uncle Sam Wants

At the request of the U. S. Food Administration our Company has loaned one of our Modern Electric Ranges to be used for the Food Conservation Demonstrations now being conducted in the Liberty Temple.

Do you want any stronger approval of any cooking device than this?

Uncle Sam asked us for an Electric Range because it fills the bill better than any other Cooking Device made.

We urge all housewives interested in the patriotic service of their country as well as all who want their kitchens equipped with the most modern, convenient and reliable cooking apparatus to visit the Liberty Temple and see for themselves just what an Electric Range will do to reduce their household burdens.

BARNUM & BAILEY CIRCUS IS COMING

Greatest Show on Earth Will Soon Exhibit in this Vicinity.

Once again the glad tidings are being spread broadcast telling of the coming of Barnum & Bailey's circus. The greatest show on earth, it is announced, will positively be exhibited within easy traveling distance this season and, as usual, a large percentage of the population will declare a holiday to visit the show.

The big circus will exhibit in Portland on September 2.

It is promised that nothing to compare with the present Barnum & Bailey performance has ever before been seen under canvas. New and novel features have been imported from abroad and a program of events, thrilling, educational and screamingly funny, will occupy every instant in three rings, four stages, the riggings above and the hippodrome surrounding for more than three hours.

There is a new and gorgeous pageant entitled, "Aladdin and His Wonderful Lamp," in which nearly 1,400 persons, and one thousand animals appear in magnificent costumes rivaling the dress of the people of the famous "Arabian Nights" story. This will be followed by a host of acts in all parts of the great enclosure. There will be sixty clowns, a greatly increased menagerie of wild and untamed animals, four great herds of elephants, several caravans of camels and many recently born baby animals.

The free street parade, which will start from the circus lot at 10 o'clock on the morning of circus day, is entirely different from anything of the kind ever shown before. It will be three miles in length and there will be bands on foot, on horseback, and riding on top of wagons of red and gold. There will be six bands in all and they will be assisted by three steam calliopes and an electric piano.

With the largest tent in the history of all circuses, the Barnum and Bailey circus promises this season to make good again its boast that it is the Greatest Show on Earth. Five railroad trains comprising 89 railroad cars, will be required to transport its paraphernalia, and more than 750 horses will be used to transfer its wagons from the railroad yards to the show lot.

Extravagance in His Pens.

"For two years," announces one of those eccentric persons who make a business of collecting strange and startling facts, "Thackery did all his writing with one pen, which also served him for writing two novels. Oliver Wendell Holmes used a gold pen for more than 30 years, during which he wrote 12,000,000 words."

That, we may consider, is genuine pen conservation, and it may be typical of a general economy that was far more prevalent in days of Thackery and Holmes than it is today. Otherwise a writer in the Providence Journal, Pens in the last quarter century have come to be rather lightly esteemed by those persons who find a continual use for them. One throws away an old pen and puts a new one in the penholder with little thought of the potential waste. A gold pen, of course is exceptionally durable, as a rule, but the one that performed service for Dr. Holmes for more than 30 years must have been a marvel. Anyway, it was obviously a far better one than the one that served Thackery for only two years. His was probably an old-time quill pen, but even then a quill pen that would last through the writing of two novels as extensive as those produced by Thackery must be regarded with profound respect.
