

"AIR BLAST" UNIVERSAL

The "Air Blast" Universal is more than an ordinary smoke consuming heater, however. It is a heat producer beyond compare. Thousands are in use and it is one of the biggest selling heaters we carry.

The air for the "Air Blasts," enters the stove through the intake at the front as indicated and passes entirely around the fire pot becoming superheated before it is discharged in sharp "air blasts" through the openings provided.

These two wonderful features of construction are what particularly distinguishes the "Air Blast" Universal and makes it the greatest fuel saver and most powerful combined coal and wood heater on the market.

It is a high class, well built stove which will last, giving economical service as long as it is in use.

We will be glad to demonstrate these features and the many others which are embodied in this stove, and urge you to visit our store when next in the vicinity, as actual demonstration will tell you more in ten minutes that we could tell you in a book. No obligation to buy.

At the Gresham sanatorium are two babies, a girl and a boy. The baby girl belongs to Mr. and Mrs. Roy Peterson, of the Twelve-Mile store. Mr. and Mrs. Robert Orlist of the Snowflake Dairy farm are the parents of the boy. Until their real names can be selected the babes are called Midget Peterson and Moose Orlist, because one weighs three pounds and the other twelve. Their voices correspond to their weight. When Moose cries his voice rattles the window panes, frightening Miss Midget into a dainty weep and together they sound like a bass and lyric soprano duet, rather strong on the basso profundo.

The reception given in honor of the Reverend and Mrs. R. E. Myers and their family, at the Methodist church, Friday evening, was a very pleasant one. L. L. Kidder is having a fine garage built, Frank Jones and Hayden Hiatt in charge. Mr. Jones has been in the building business long to get tacks and tar mixed, but Hayden really knows better, but let his thoughts wander away from the roofing paper he was putting down, and made the mistake of putting the tacks along the edge of the paper and emptied the tar into a pocket. Perhaps the paper will be just as well.

We Welcome Small Accounts

A bank account like everything else must have a beginning. The size of the first deposit is not of especial importance; a strong determination to add to it regularly is what counts.

Many a large fortune has developed from the smallest kind of a start.

It is for this reason that we welcome the small account with the same degree of cordiality that we do the large one.
