Government Whitewash.

The following is the government formula for whitewash and will be found very useful on every farm, for the liberal use of whitewash not only adds greatly to the appearance about the farm, but it also serves an excellent purpose in destroying germ life. This formula, which we are reproducing, should be saved for reference and used often.

One-half bushel unslaked lime, 1 peck of salt well dissolved in warm water, 3 pounds of ground rice boiled to a thin paste, stirred into the mixture when boiling hot; half pound of powdered Spanish whiting, 1 pound glue previously dissolved over a slow fire. Five gallons of hot water complete the mixture. Stir well and let it stand for a few days before using. Protect it from dirt and extraneous matter. It should be put on while hot. One pint of the mixture will cover a square yard if properly applied. This can be used with brushes or with a machine. The salt and the lime both possess disinfecting qualities and the glue gives a lasting finish and prevents the whitewash from rubbing off. Anyone who has used the ordinary solution without glue will be surprised at the great improvement this makes.

Station Tests Seed Treatment.

Extensive fall plantings of cereals have just been completed on the O. A. C. experiment station farms to determine the effect of different seed treatments for smut control. Former experiments at Corvallis have indicated that when conditions are not favorable to the prompt germination of the grain, due to late planting or planting in dry soil, the blue-stone-lime treatment is much safer than formaldehyde, usually quite satisfactory when conditions favorable for prompt germination, it planted immediately after treatment. The new experiments, in charge of Miss J. P. Rose, federal representative at the college, are to ascertain the effects of these different treatments on the germination and vitality of the grain and on its ability to resist the attacks of fungi in the soil which are likely to do considerable damage to grain sprouting under unfavorable conditions. These problems will receive attention of specialists at Farmers' week, December 29-January 3.

FARMERS WEEK OPENS WITH GOOD ATTENDANCE

More than 300 farmers and county agents had registered at O. A. C. for Farmers' Week Monday night. Lectures and demonstrations are features of the program. Such subjects as the following are being discussed: "An easy way to increase the use of agricultural lime," by Professor C. V. Ruzek. "Selection of a stock farm," by Prof. E. L. Potter. "Club Projects and organization by H. C. Seymour, state club leader. "Contagious abortion in cattle," by Dr. B. V. Sims. "Standard clubs," by E. R. Peterson, Coos county leader. Demonstrations are being given on stock judging and different phases of farm work. Besides the educational features there are entertainments, conferences, association meetings and consultations.

One of the subjects to be studied is the importance of advertising as a means of disposing of farm produce in a profitable manner. Advertising experts will give lectures on the most effective style of advertisement.

Obituary of David J. Culy.

David J. Culy was born in Sheboygan county, Wisconsin, December 3, 1849. He lived in Wisconsin until 1885, when he came to Oregon, living for three years in Douglas county. He came to Gresham in 1892 and had made his home here nearly all of the time since then. Last fall he went to southern Oregon and only a few weeks ago returned to Portland, where his death occurred on Tuesday, December 23. He is survived by his widow, Orpha Culy, a brother, J. A. of Aberdeen, Washington; two sisters, Mrs. Alida Giese of Gresham and Mrs. Clara Miller of St. Helens, Oregon. Mrs. Guy Fieldhouse of St. Helens and Mrs. Jessie Binder of Elkton, Oregon, are aunts. There are also several nephews and nieces outside the state.

The funeral services were conducted on Friday afternoon from the Carlson undertaking chapel by A. C. Freed, head of the Christian Science committee on publications for Oregon.

Mr. Culy was quiet and unassuming in his life and was governed by honesty and integrity of purpose. He was always helpful to those about him.

Nearly 20,000 letterheads are being printed at the Outlook office for nearly 30 different business concerns of Gresham. The letterheads are being printed in two colors with a concise description of the advantages, resources and community organizations on the back of the sheet. These are intended to help spread over a wide area, through business and personal correspondence, information regarding the famous Powell Valley section. A neatly printed letterhead is undoubtedly one of the very best advertising mediums for a business concern both locally and at a distance.

Mrs. W. R. Kern has been ill for the past few days but is now much improved.

The County Agent's office will be closed from January 1 to January 12, 1920. Fire Department Will Elect Officers January 5.

A regular meeting of the Gresham Volunteer Fire Department will be held January 5 at which time the regular election of officers will be held. All business men and members of the council are especially invited to attend this meeting. One or more of the state fire marshals will be present and give the report of their recent investigation of the fire situation in Gresham.

Most Notable Convention.

Preliminary plans for the republican national convention at Chicago on June 8, as outlined by Chairman Will Hays at the recent meeting of the republican national committee, indicate that this will be one of the most notable conventions ever held in history of the party. Certainly it will be the largest, in the number of party workers entitled to official seats in the convention, although the number of delegates has been slightly reduced.

This list will include the state chairman of each state, the head of the women's division of the republican party in each state, the chairmen of the ways and means committees of the various states, and the chairmen of the women's branch of the ways and means committees. Mr. Hays believes that these party workers should be given every recognition at Chicago, and that they will thus be better prepared to take up the work of the campaign. The chairman announced that although the auditorium at Chicago, in which the convention will be held, had been enlarged, it was his purpose to have just as many of the leading party workers in attendance as he could crowd onto the floor, and that he believed the convention would be a record-breaker for attendance and enthusiasm.

According to Senator Brandegee of Connecticut none need lose a moment's sleep over the question of the European nations not accepting the League of Nations with the reservations proposed by the republicans. Senator Brandegee believes that Europe will accept the Americanized pact if given the chance.

MELROSE AND VICTORY

A very good meeting was held at the Cliff Sunday school last Sunday. Recitations and songs by the children and special music by Leon Caddy, Mrs. I. T. Wood and Rev. Earl B. Cotton was much enjoyed. Rev. Cotton told Henry Van Dyke's story of the Four Wise Men in a way that was much enjoyed.

Miss Edith Turner, of Portland, spent the week-end visiting with Miss Mabel Wood who is home from Willamina where she is employed as primary teacher.

Starch Factory Running.

The Northwest Potato Starch and Milling company is operating two shifts a day and turning out the finest quality of starch made from cull potatoes. New additions to the plant are being made in order to more thoroughly grade the starch and it is hoped soon to take care of the pulp which when dried can be kept indefinitely and makes the finest stock feed. At present it is being used by farmers in the wet state, loads of it being hauled away each day.

It appears as if the farmers are coming into their own when valuable products can be made from apparent refuse.

Furs are likely to look matted and crushed when taken out in the fall. If hanging for a few hours in a brisk wind does not restore them, they can be freshened by brushing against the grain with a clean, moistened brush. Leave them to dry for about an hour, then beat with a rattan and comb with a coarse comb.

Some people play at their work and then work at their play and do neither one well.
