**"SIMPLICITY"**

In order to determine the real or intrinsic value of a piano (which is the simplest thing possible) it is only necessary to eliminate all "guessing schemes," "puzzle contests," "the continual special sale artist," and the "dealer who gives you something for nothing" in the shape of free prizes, etc., and center your attention on some one responsible firm whose past record will bear the closest scrutiny as to its businesslike methods, the real quality of its goods, and the financial ability to stand back of its patrons. Above all else, do not purchase a "Stencil Piano," no matter what the merchant may claim for it. The very fact that it bears "a fictitious name," a "non-de-plume"—that is a name that in nowise establishes its origin—is proof positive that its maker does not wish to be identified with it for fear of being held responsible for its up-keep. It is safe to say, no matter at what bargain price they are sold, they will provide a goodly profit to the dealer (and it's just as certain that instead of buying a piano, you really borrow a lot of trouble and expense).

**BUSH & LANE PIANO MANUFACTURING CO.**

will neither build or sell CHEAP STENCIL PIANOS. Every piano bears our name as the builders and sellers and is guaranteed in the strongest possible terms. No better piano exists at any price and we stand ready to pay \$1000.00 in cash if there is "Any Piano Made" (case excepted) which costs more to build than a Bush & Lane Piano. The fact that we manufacture and sell direct enables us to sell at a price considerably less than is customary through agencies. Our deferred payment plan calls for only 7 per cent interest, instead of the usual 8 per cent interest. All Bush & Lane Pianos are patented in one or more ways. We have repeatedly sought the aid of the law in protecting these patents, showing that other builders of pianos have deemed them of value.

**WHY THE ELECTRIC CLEANER?**

There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping.

True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and a carpet beater will do the work after a fashion.

In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."

But people use soap because it cleans more easily and better than water alone.

For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.
