This is presumed to be a representative form of government and when an individual refuses to abide by the majority decision in matters appertaining to the conduct and welfare of the community in which he lives, he certainly falls short of being a one hundred per cent American citizen.

Another fellow who falls a long way short of the one hundred per cent standard is the fellow, who because, he cannot wield the people, in the neighborhood where he resides, to his way of thinking, takes his time, money, and the little influence he may possess and truckles to some other neighborhood.

Don't fail to read the Outlook's "booster column."

They were accompanied by Harry Bramhall and family of Troutdale and Mr. and Mrs. Wm. Bramhall of Battle Creek, Washington, leaving here on the 27th and returning on the 31st.

The longest vacation trip was enjoyed by Wm. Hurt and family, who left the 22d of May via eastern Oregon, Utah and Wyoming on an auto trip to central Missouri. They got home again on the 21st and all agree that Oregon looks pretty good to them.

Last week Mrs. Harding chaperoned a party of boys and girls on a two days' hike to the top of Larch mountain and back. The ascent was made via Multnomah Falls trail, the descent via Wahkeena Falls. **WHY THE ELECTRIC CLEANER?**

There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping.

True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and a carpet beater will do the work after a fashion.

In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."

But people use soap because it cleans more easily and better than water alone.

For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.
