SIMPLE JOB OF WASHDAY

You know that clothes washed among dirty, unsanitary surroundings are not likely to be clean or safe to wear. The THOR solves the problem. You can have the washing done in your own home—under your supervision and where you know sanitary conditions exist. A THOR in your home means absolute cleanliness—positive sanitation. There is no possibility of the clothes becoming infected with disease germs because they do not come in contact with the clothes of others.

Stop and consider—no black kettles—no wages to pay—no laundry bills—and the clothes washed perfectly. Isn't all this worth two cents a week? That's all it costs to do your washing with a THOR. Anyone can operate the THOR—even the most unskilled help can use it without becoming confused. The clothes are put into the cylinder and then a push of a button starts it—that's all there is to it. The THOR not only washes, but wrings. The reversible wringer makes quick work of this part of the washing. One lever controls the operation.

The present gasoline situation is not so seriously affecting owners of DORT cars because the DORT averages from 20 to 25 miles to the gallon of gasoline.

For many other reasons, too, the DORT is the most desirable car, for example, its economy on oil and tires and its very low cost of operation.
