AN ESTIMATE OF HARDING

"For more than three years I have known intimately Warren G. Harding, republican nominee for president, having served with him in the senate since the early part of June, 1917, says Senator Charles L. McNary. "During that period of American political life every angle of a legislator's mind was brought into the foreground, and I am pleased to say that the senator's mind stood steady and his voice ever sounded the words of Americanism. When some would falter he beckoned to go ahead and never once was his intense patriotism questioned or his judgment discounted.

"Throughout his career in the Ohio state legislature, and as a United States senator, his influence has ever been used in the service of the people. By temperament he is gracious, yet strong in his convictions and he yields only when after careful thought he finds his course a mistaken one.

"During my term in the senate, Mr. Harding voted for woman's suffrage, and subsequently used his influence to secure its ratification in several states. He voted in favor of submitting the national prohibition amendment to the citizenry of the country. He voted for all legislation that had for its purpose the promotion of our war program. After the conclusion of the World War he voted for the treaty of peace and the covenant of a league of nations with such reservations as were thought by the majority of the senate to be essential to the welfare of our country.

"As a member of the senate commerce committee, I had much to do with Mr. Harding and was in a position to observe his attitude on this large subject. What to do with our merchant marine, which cost the government over three billion dollars, was a question which taxed the best thought of America. The senate commerce committee had hearings on proposed legislation covering a period of several months. During the hearings, Senator Harding showed a very clear conception of America's needs for a merchant marine adequate to care for her commerce. He was ever alert to use his influence against the interests that desired to procure the ships under favorable terms which would have worked a hardship on the taxpayers of the country. His mind was centered upon legislation that would assure the American people ample tonnage for their products and a policy that would develop new ports and trade routes.

"In many conversations with the senator I found him greatly interested in farm problems and the development of our basic industry through reclamation and irrigation of our idle lands.

"In my opinion Senator Harding will make an ideal president and will bring to his assistance the best thought of America."

Road Signs to Be Put Up.
Division engineers in the employ of the state highway department have been instructed to install detour signs on all the state roads where they are needed for the convenience of tourists, according to a letter received by Governor Oletcott from the state highway commission. Governor Oletcott recently called the attention of the commission to the necessity of these signs, and urged immediate action.

WHY THE ELECTRIC CLEANER?
There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping.
True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and a carpet beater will do the work after a fashion.
In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."
But people use soap because it cleans more easily and better than water alone.
For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.
