Do You Get Your Tire Mileage You Want?

Have you not noticed that the majority of your tires blow out before they wear out? You wonder why. One of the principle reasons for all tire trouble can be traced to punctures which have a tendency to break down the side walls, rim cut and breaking of your rubber loose from your casing allowing water to enter and which in a short time ends the life of your tire long before it should.

Now stop those punctures and save money, time and worry. Investigate as others have the tire insole which is the one thing to date which has been successful in eliminating punctures and blow outs.

A few of our Gresham patrons: Brown's Market, Sanitary Market, Dr. H. V. Adix, K. A. Miller, Peter Lenard, City Bakery, Chas. Cleveland.

Write or phone and we will be glad to show these Tire Insoles.
