Get the moult over!

Eggs and feathers are made of practically the same elements. Hens can't make both at the same time. They don't lay until they stop moulting.

The whole key to more winter eggs is in your hands now.

Don't let your hens drag through the moult without help. If you do, they'll be run-down just when they should be in perfect condition for heavy winter laying.

Begin now to use Dr. LeGear's Poultry Prescription in their feed regularly. More than a million poultry raisers have proved that this famous tonic and regulator is a wonderful aid during moult. Because it improves the whole digestive system, hens get full value from their feed. That means a quicker moult, without strain. Give hens this help and get more winter eggs.

Ford

THE UNIVERSAL CAR

The Ford Sedan, with electric self-starting and lighting system and demountable rims with 3 1/2-inch tires front and rear, for every day in the year has no equal as a family car. Just as popular on the farm as it is in the city. In fact, it fits the family demands in every vocation of life. Large, roomy seats, finely upholstered, plate glass windows make it an open car in pleasant weather, while in rainy and inclement weather it becomes a closed car, dust-proof and rain-proof. It is not only comfortable, but really cozy, and above all, economical in operation and maintenance, and has all the Ford merits of strength and durability.
