ESTACADA

Fordson For Christmas

Visions of happiness and better days for those who work the fields.

Steering a powerful iron horse over the fields is a manly job; seeing the powerful tractor roll the furrows has worked even a city man into great enthusiasm—they, too, want to be farmers.

A Fordson is a real Xmas present—and you have the comforting thought of money well spent. It brings happiness and profit besides.

Stroke "Old Nell" on the nose and tell her that Santa Klaus is to bring a Fordson to the farm.

Threaded Rubber Insulated Battery in Your Car

More than twelve years ago Willard built his first automobile starting, lighting and ignition battery—several years before electric starting came into general use.

For more than twelve years the one object on which Willard effort has concentrated has been automobile batteries—batteries that would serve the car owner longer, more efficiently and more reliably.

This consistency, this concentration on one big problem, has resulted in Willard leadership in the automotive battery field, and is responsible for—among many and varied contributions to the industry—the perfection of Threaded Rubber Insulation, the greatest battery improvement in years.

There are today 168 passenger car and truck manufacturers using the Still Better Willard Battery—the only battery with Threaded Rubber Insulation.
